MESSAGE

It gives me immense pleasure to present the *Standardized Assessment for Elementary Schools (SAfES),* an important initiative undertaken to strengthen the quality of elementary education in Mizoram. In line with the vision of the National Education Policy (NEP) 2020, SAfES reflects our commitment to improving learning outcomes through meaningful and competency-based assessment practices.

This initiative marks a significant step towards shifting from rote memorization to a deeper understanding of concepts, ensuring that our students are equipped with the necessary skills for lifelong learning. By focusing on key stages such as Classes V and VIII, SAfES not only evaluates student performance but also helps in identifying learning gaps and guiding targeted interventions.

I commend the efforts of SCERT and all stakeholders involved in conceptualizing and implementing this initiative. I am confident that SAfES will contribute greatly to building a robust and equitable education system in Mizoram.

Dr. Vanlalthlana

DAVID LALTHANTLUANGA, IAS
Secretary to Government of Mizoram
School Education Department

MESSAGE

The introduction of the *Standardized Assessment for Elementary Schools (SAfES)* represents a progressive step towards strengthening the education system in Mizoram. This initiative aligns with the broader goals of the National Education Policy (NEP) 2020, focusing on improving assessment system and enhancing student learning outcomes.

SAfES establishes a uniform and structured framework for evaluating student performance across schools, ensuring consistency and transparency in assessment practices. By focusing on Classes V and VIII, it provides critical insights into students' learning levels at key stages of their educational journey.

The data generated through SAfES will play a vital role in informed decision-making, helping educators and policymakers design targeted interventions to address learning gaps effectively.

I extend my appreciation to SCERT and all contributors for their dedicated efforts in bringing this initiative to fruition. I am confident that SAfES will significantly contribute to the continuous improvement of elementary education in the state.

(DAVID LALTHANTLUANGA, IAS)

MESSAGE

The *Standardized Assessment for Elementary Schools (SAfES)* has been developed as a systematic effort by SCERT to enhance assessment practices and support effective teaching-learning processes across the state.

Aligned with the National Education Policy (NEP) 2020, SAfES emphasizes competency-based evaluation, where students are assessed on their understanding, application, and skills rather than mere memorization. The assessment is carefully designed to serve both diagnostic and developmental purposes, enabling educators to identify learning gaps and take appropriate measures for improvement.

Great care has been taken to ensure the reliability and standardization of the assessment process. Question papers are developed based on clearly defined learning outcomes and competency frameworks, and all materials are rigorously reviewed by subject experts to maintain quality, fairness, and validity.

It is our hope that SAfES will serve as a valuable tool for teachers, school leaders, and policymakers in their continuous efforts to improve educational outcomes in Mizoram.

(CAROLINE ZORAMTHANGI)

1. INTRODUCTION

The Standardized Assessment for Elementary Schools (SAfES) is a significant initiative of the Hon'ble Minister of School Education, implemented by the State Council of Educational Research and Training (SCERT), to enhance the quality of elementary education in Mizoram. SAfES 2026 focuses on key stages of elementary education, particularly Classes V and VIII. The assessment covered English, Mizo, Hindi, EVS, and Mathematics for Class V, and English, Mizo, Hindi, Social Studies, Science, and Mathematics for Class VIII.

The term standardized implies that all students answer common questions under the same rules and are evaluated through a uniform marking system. The questions are prepared according to pre-defined learning outcomes and competencies to ensure a transparent, credible, and equitable assessment process. The assessment is further supported by marking schemes, reporting formats, and answer keys to reduce subjectivity. All question papers are reviewed and validated by subject experts.

In alignment with the vision and recommendations of the National Education Policy (NEP) 2020, SAfES aims to strengthen assessment practices, improve pedagogical processes, and ensure the effective attainment of learning outcomes among students. SAfES has been conceptualized to address learning gaps and establishes a uniform system for evaluating student performance across schools.

The assessment is designed on the basis of a systematic blueprint and clearly defined assessment rubrics, incorporating the curricular goals and competencies prescribed in the NCF-SE. It has also been carefully developed to measure different levels of cognitive skills, ensuring a comprehensive evaluation of students' understanding, application, and higher-order thinking abilities. This provides a more accurate picture of students' learning outcomes and academic progress. SAfES will also help identify areas where teachers require professional development and where students need additional support, thereby informing policy decisions and targeted interventions.

2. NATURE AND OBJECTIVES OF SAFES

SAfES is not merely an examination intended to determine pass or fail outcomes, nor is it designed to judge the performance of individual schools. Its primary purpose is to assess the actual learning levels and academic progress of students while providing a comprehensive understanding of learning outcomes across the education system. The assessment is conducted in a fair, transparent, and standardized manner.

To uphold integrity and ensure confidentiality, all officials involved, including headmasters and teachers, are required to sign a Confidentiality Certificate. The objectives of SAfES are as follows:

- To initiate meaningful progress in reforming assessment practices.
- To shape how teachers plan and deliver classroom instructions through assessment.
- To implement a uniform and standardized assessment system across all elementary schools in Mizoram through a common assessment platform, and to assess students in a competency-based manner aligned with common curricular goals and competencies.
- To design and conduct examinations based on national level competency-based question papers.
- To identify the diverse learning needs of children and analyse teachers' needs through students' performance.
- To equip students to meet the standards of national level assessments such as PRS, SEAS, NTS, etc.

3. VALIDITY & RELIABILITY

To ensure reliability, validity, and uniformity, SAfES follows a carefully designed and standardized test development process. The assessment tools are developed in alignment with clearly defined learning outcomes and competency-based frameworks consistent with national educational standards. Each stage of the process is systematically planned, beginning with the preparation of detailed blueprints, assessment rubrics, and the vetting of question papers.

Blueprint: The blueprint clearly specifies how the question paper is to be structured by outlining the proportion and allocation of different content areas, ensuring that all

relevant topics are adequately represented. It also defines the range of cognitive skills to be assessed, such as knowledge, understanding, application, analysis, evaluation, and creation in subjects like EVS, Social Studies, Science, and Mathematics.

In English, Mizo, and Hindi, cognitive skills such as knowledge, comprehension, expression, and appreciation are included. This ensures that the assessment goes beyond mere recall and captures deeper learning. The blueprint also defines the formats to be included, such as MCQs with four options, objective-type questions, very short answers, short answers, and long answers, while indicating how marks are allocated across topics and question types.

Moreover, it determines the distribution of difficulty levels across the paper, generally balancing easy, average, and difficult questions to cater to diverse learner abilities. This systematic distribution ensures that the question paper is comprehensive, balanced, and aligned with intended learning outcomes, thereby enhancing its validity and reliability.

Benjamin Bloom's taxonomy of Cognitive levels used in blueprint of question papers for different subjects can be explained as below:

Bloom's Taxonomy of Cognitive Levels

i. **Knowledge/Remembering:** Knowledge or remembering refers to the ability to recall information stored in long-term memory. It involves retrieving previously learned material, such as definitions or lists. Although it is the lowest level in the taxonomy, it is fundamental to learning, as higher-level thinking depends on having this knowledge in place. This level does not require understanding—only accurate recall.

ii. **Understanding:** Understanding involves making sense of information by interpreting, organizing, or summarizing it. It focuses on constructing meaning and identifying relationships between ideas. Examples include classifying animals into categories (such as marine, avian, terrestrial, or amphibian), explaining cause-and-effect relationships in history, identifying the moral of a story.

iii. **Application:** Applying is the process of using learned knowledge in practical situations. It requires recalling information, understanding it well, and then using it to solve real-world problems, complete tasks, or address challenges.

iv. **Analysis:** Analysis involves breaking down information into smaller parts and examining how those parts relate to one another. At this level, learners use their prior knowledge and understanding to identify patterns, make comparisons, and draw connections. It also includes simplifying or summarizing complex information.

v. **Evaluation:** Evaluation is the ability to make judgments based on established criteria. It involves assessing ideas or outcomes through processes such as checking, critiquing, and forming reasoned opinions.

vi. **Creating:** Creating is the highest level of the taxonomy and involves producing something new and meaningful. It requires integrating all previous levels—remembering, understanding, applying, analyzing, and evaluating—to develop a final product, which may be either tangible or conceptual.

vii. For language subjects, the cognitive skills and competencies were categorized as comprehension, expression and appreciation. Comprehension is the ability to understand what you read or hear. In language subjects, it implies understanding stories, poems, passages, grasping meanings of words, sentences, ideas, and interpreting the message or theme. Expression is the ability to communicate your thoughts, ideas, and feelings clearly. In language subjects, it implies writing essays, letters, answers, speaking clearly in discussions or presentations and using correct grammar and vocabulary. Appreciation is the ability to enjoy, value, and respond to literature. In language subjects, it implies enjoying poems, stories, plays, understanding beauty, style, emotions in writing and giving opinions about a text.

Language Competencies: For language subjects, competencies were categorized into comprehension, expression, and appreciation.

- **Comprehension** refers to understanding what is read or heard, including stories, poems, and passages.
- **Expression** refers to communicating ideas clearly through speaking or writing with proper grammar and vocabulary.

- **Appreciation** refers to valuing and responding to literature by understanding beauty, style, emotions, and themes.
- **Knowledge** refers to a person's understanding of the English language and related concepts. It measures what the learner knows about grammar, vocabulary, reading comprehension, writing rules, and language conventions.
- **Usage (Thumal)** refers to how correctly and effectively a person uses a language in writing or speaking. It focuses on applying grammar, vocabulary, sentence structure, and language conventions properly.
- **Writing** refers to the ability to express ideas clearly, logically, and effectively through written language. It measures not only grammar and vocabulary, but also how well a person organizes and develops ideas for a specific purpose and audience.
- **Grammar** refers to the rules that govern how words are used and arranged to form correct and meaningful sentences. It measures a person's ability to use English accurately in speaking and writing. Grammar includes: Parts of speech, Sentence structure, Verb tenses, Subject-verb agreement, Pronouns, Articles, Prepositions, Punctuation.

Assessment Rubrics: Comprehensive assessment rubrics were developed in advance to support objective and consistent evaluation of student responses, minimizing subjectivity and ensuring fairness. Question items were designed to assess not only knowledge recall but also higher-order thinking skills such as understanding, application, and analysis.

Answer Key: The SAfES answer key provides correct responses and marking guidelines for all assessment items, ensuring uniform, fair, and accurate evaluation across schools while supporting effective analysis of student performance.

Moderation and Vetting of Question Papers: All assessment materials undergo multiple levels of rigorous review and vetting by experienced subject experts, school teachers, and academic professionals. This process ensures the accuracy, clarity, relevance, and appropriateness of each item, while eliminating potential bias or ambiguity. Standardization protocols are strictly followed throughout, thereby maintaining consistency across different administrations of the assessment.

Overall, these measures collectively uphold the credibility, fairness, and academic integrity of SAfES, ensuring that it serves as a reliable tool for measuring student learning outcomes and informing evidence-based educational decisions.

4. COVERAGE AND IMPLEMENTATION

All schools managed or aided by the Government are required to participate in SAfES. It is conducted in the larger interest of the education system as a whole and is not intended to promote competition among schools or to highlight top-performing institutions. SAfES were implemented in the following categories of schools:

- Government Schools
- Deficit Schools
- Grant-in-Aid (GIA) Schools

Private schools and schools under Autonomous District Councils are currently not included, besides these, seven schools from Saitual district were excluded due to the 61st KṬP General Conference. The assessment was conducted for Classes V and VIII for the third term portion of the academic session 2025 – 2026.

In class V, a total of **7889** children from **733** schools participated and in class VIII, a total of **7218** children from **712** schools participated.

5. EXAMINATION PROCESS AND SECURITY MEASURES

The examination process for SAfES along with its security measures can be outlined as follows:

- Consultation meeting with MSTA was held on 24th October, 2025.
- Notification for the Implementation of SAfES was issued by the Director, SCERT Vide No. 33025/27/2022-DTE(SCERT) on 7th November, 2025.
- Time table for classes V & VIII was issued on 12th December, 2025.
- Assessment rubrics was developed during 12th to 27th January, 2026.
- Coordinators of each subject of the textbook committee invited teachers or members for setting of questions which were submitted to the Director, SCERT on 23rd January, 2026 and vetting of questions papers was completed on 30th January, 2026.
- Consultation meeting on SAfES was convened with the SDEOs on 6th February, 2026

- All DIETs were requested to supervise schools during SAfES examination. Officers of SCERT were also assigned to visit and supervise schools during the exam.
- Password-protected question papers (PDF format) were released to SDEOs on 7th February, 2026.
- During assessment period, observers were appointed to oversee seamless conduct of SAfES in various schools and constructive feedback was recorded for future reference.
- SDEOs distributed question papers to schools at the appropriate time.
- Assessment rubrics and answer keys were shared one day before each examination.
- Answer keys were shared with headmasters and password for the answer key was shared at 1:00 P.M. after the examination.
- Schools submitted reports in prescribed Excel format to SDEOs by 3rd March, 2026 (online/offline). A separate Google Sheet link was provided for submission.
- SDEOs compiled and submitted reports to the Director, SCERT by 20th March, 2026.
- SCERT prepared consolidated reports at sub-division, district, and state levels.
- SDEOs maintained communication groups, including all middle schools for coordination and timely information sharing.
- Answer scripts must be securely preserved by schools for at least one year.
- Final results were prepared and declared by the respective schools following standard procedures.

6. DISTRIBUTION & COMPILATION OF MARKS

- Question paper carries : **100 marks**
- SAfES Examination : **50%**
- Internal Tests and Activities : **50%**
- Examination duration : **3 hours**
- Only **50% of SAfES marks** were counted (marks obtained divided by two).
- Internal assessment marks were awarded by respective schools.

Weightage of Class V	Mizo	Weightage to Objectives

7. RESPONSIBILITIES OF SCERT UNDER SAFES

The Directorate of SCERT being the Academic Authority of Elementary Education, is responsible for implementing SAfES. Its responsibilities may be outlined as follows:

- To develop portion for Final Examination and send them to Directorate of School Education for dissemination to schools and publish on the official website of SCERT.
- To develop question templates, blueprints, sample questions, & assessment rubrics and publish on the official website of SCERT.
- To ensure competency mapping based on NCF 2023.
- To prepare and provide guidelines, question papers, and answer keys with strict confidentiality.
- To issue evaluation guidelines.
- To ensure that the answer sheets are assessed by headmasters and teachers and retained for one year.
- To allow schools to declare results independently.
- To collect comprehensive reports and examination results from schools through SDEOs.
  - Each SDEO will submit the Reports to Director, SCERT.
- The SCERT will prepare State Report for submission to the Government.

OVERVIEW OF THE REPORT

The report presents the average scores and performance levels for both **Classes V** and **VIII**, along with SDEO-wise average scores expressed in percentages, and the performance grading scale. It also includes subject-wise average scores and students' performance levels are categorized as **Below Average (39 and below)**, **Average (40 – 59), Above Average (60 – 79), and Outstanding (80 and above)**. This classification helps in identifying learning gaps, benchmarking student achievement, and guiding targeted academic interventions.

In Class V, the distribution of student performance reflects a slightly balanced academic profile. The data indicates that **26.72%** of students fall under the Below Average category and the largest proportion, **48.01%** of students were classified as Average. This shows that nearly half of the students have achieved a satisfactory level of competency, meeting basic expectations. A notable **23.07%** of students fall into the Above Average category, which is a relatively strong proportion and **2.20%** of students achieve Outstanding performance.

In Class VIII, the distribution of student performance indicates that **34.02%** of students fall under the Below Average category. The largest group comprising of **46.62%** of the students fall within the Average category suggesting that nearly half of the students are meeting minimum expectations. Meanwhile, **17.52%** of students are categorized as Above Average and only **1.84%** of students achieve the Outstanding level indicating that very few students reach the highest standard of academic excellence.

The overall state performance data indicates moderate levels of student achievement, with some variation across grade levels and locations. The state average score for **Class V** is **48%** and in **Class VIII**, the state average drops to **45%**, reflecting a noticeable decline in performance as students move to higher grades. The data highlights that Class V and VIII students' performance in urban and rural areas have a slight disparity as students in urban areas have an average score of **48.5%**, while those in rural areas score **46.5%** on average. The data highlights a decline in average performance from Class V to Class VIII, and a slight gap between urban and rural student achievement. The report provides valuable insights into student performance patterns and highlights areas that require strategic planning, targeted interventions, and continuous monitoring to improve the quality of elementary education.

The assessment revealed that many schools are facing a shortage of Hindi teachers. Data from 10 SDEOs highlights a significant gap across multiple locations, with 44 schools at the Class V level and 40 at the Class VIII level lacking Hindi teachers. This shortfall adversely affects student performance and calls for urgent corrective measures, as it poses a serious barrier to academic progress.

During the assessment period, the percentage of trained teachers were collected and organized SDEO-wise as presented below:

Sl. No	SDEO	Trained Teacher (in %)
1	Aizawl East	98
2	Aizawl South	97
3	Aizawl West	98
4	Champhai	87
5	Darlawn	89
6	Hnahthial	88
7	Kawnpui	95
8	Kawrthah	89
9	Khawzawl	93
10	Kolasib	96
11	Lunglei North	93
12	Lunglei South	95
13	Lungsen	99
14	Mamit	98
15	Ngopa	94
16	North Vanlaiphai	95
17	Saitual	96
18	Serchhip	95
19	Thenzawl	96
20	West Phaileng	94

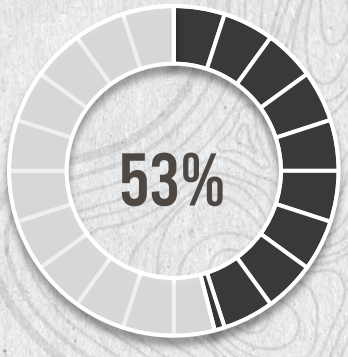

It is important to examine why certain teachers are not yet trained and to address the underlying causes through proper research and initiatives.
