# THE CONSTITUTION OF INDIA 

## PREAMBLE

we, THE PEOPLE OF INDIA, having solemnly resolved to constitute India into a ${ }^{1}$ [SOVEREIGN SOCIALIST SECULAR DEMOCRATIC REPUBLIC] and to secure to all its citizens :

JUSTICE, social, economic and political;
LIBERTY of thought, expression, belief, faith and worship;
EGUALITY of status and of opportunity; and to promote among them all
FRATERNITY assuring the dignity of the individual and the ${ }^{2}$ [unity and integrity of the Nation];
IN OUR CONSTITUENT ASSEMBLY this twenty-sixth day of November, 1949 do HEREBY ADOPT, ENACT AND GIVE TO OURSELVES THIS CONSTITUTION.

1. Subs. by the Constitution (Forty-second Amendment) Act, 1976, Sec.2, for "Sovereign Democratic Republic" (w.e.f. 3.1.1977)
2. Subs. by the Constitution (Forty-second Amendment) Act, 1976, Sec.2, for "Unity of the Nation" (w.e.f. 3.1.1977)

## 

## FOREWORD

The SCERT Mizoram has always been committed in fulfilling its role as academic think-tank for providing quality education in the State. Our role as Academic Authority for elementary education has entrusted us with the responsibility of formulating the curriculum, textbooks and evaluation procedures. It is with pleasure that I announce the introduction of NCERT textbooks for Classes I - V which have been adapted and translated to be user friendly for learners of Mizoram.

On behalf of the SCERT, I express my gratitude to the NCERT, New Delhi for sharing the copyrights of the books and allowing us to translate the books into Mizo and to make necessary adaptations to make the books more meaningful for students of all Elementary Schools in Mizoram. I extend my sincere gratitude to scholars, educationists, experienced teachers and my colleagues who have contributed in formulating these new set of textbooks. Textbooks used from 2020-21 are Energized textbooks embedded with $\mathbf{Q R}$ codes to aid learning.

I hand over these books to teachers and students of Mizoram with the hope that the fundamentals of education and the recommendations of the National Curriculum Framework 2005 will be realised. We know from experience that learning is optimized when it is fun and the selection of child-friendly materials is assurance that learning becomes a pleasurable journey for the child.

I

## 11 <br> Where for look From

Our teacher told us to draw a picture of a car. We all drew the car differently. Next day, when we showed our pictures to each other, we were very excited. But Mawia started laughing. He was looking at Sanga's drawing of a car.

Mawia said - it looks like a small box kept in a bigger one. Then Mawia showed his drawing to Sanga.

Both of them drew the picture of the same car. But the drawings look different.

Sanga said he had looked at the car from the terrace. Do you think his funny drawing is right?

## $*$

Have you looked at things from different sides?
Do they look the same or different?
\& Look at the pictures drawn here. How does the table look from the side? Which picture is from the top?

Some pictures are drawn below. Imagine how these things will look if seen from the top.

Will they look like this?

3

## Practice Time

A. A cat is peeping into a classroom.
Can you help her find out where the teacher is?

B. Here are some pictures. Find out from where you have to look to see the things this way.

Staircase

Staircase

Table

C. Draw top views of a few things and ask your friends to guess what they are.

## Rangoli

You can also try and use the dots given below to make patterns.
Two examples have been drawn here.

- $\underbrace{2}_{0} 0_{0}^{0}$

Make Other Patterns Yourself

1. Copy these shapes on the dot grid. Note that some lines in the shapes are straight and some are not.

2. Use the dot grid given below to draw your own designs and shapes.
3. Complete these figures to make squares and rectangles.

$\because \quad \cdot$
$\because \square$
4. On the dot grid given below, draw the following:
a) a kite
b) a leaf
c) a flower
d) a boat
e) a star
f) $a \operatorname{pot}$

Note for teachers and parents: Free play with shapes on a dot grid can help develop children's understanding of shapes and symmetries. The chapter begins with activities to show how 2-dimensional pictures can represent 3-dimensional objects as seen from different perspectives. This is related to symmetries, an important aspect of shapes further developed in Chapter 5.

Tit for Tat
One day Mary met a painter.

After a while the painter showed her the picture.

Mary gave him a hundred-rupee note.

The painter had made many such pictures in which he drew only one half of the things. Draw the other half of these pictures and find out what these things are. Try doing it with a mirror.

Can we repeat the painter's trick, while drawing pictures of the following?

If you ask the painter to draw things which cannot be divided into two similar mirror halves, then he cannot play the trick. Draw three more such things which do not have similar mirror halves.

## Mirror Halves

Look at the pictures given below. Does the dotted line divide each picture into two similar mirror halves?

Give some more examples.

In two rectangles above, the dotted line cuts each into identical halves, but note that they are not mirror halves?

Using such letters we can also make words which have similar halves.

Making A Mask

You can make more such masks by taking help from the following pictures.

## Dot Game

Guess the number of dots in the circle. Now count and check your guess. Play this game with your friends by making circles. See who can guess best.

Children need interesting exercises to help them with visual estimation of numbers - of things arranged randomly and in symmetrical groups. Teachers could use other instances, such as bundles of leaves sold in the market, the school assembly, designs on mats, etc. to make them guess and estimate different numbers. In this book an ant has been used to show the child that a guess or estimate has to be made.

*     *         * 

## Dhoni's Century

One-day match between India and South Africa in Guwahati......., India batting first......

Fill in the blanks:
Dhoni scored $96+$ $\qquad$ $=$ $\qquad$ runs.

How many runs do these players need to complete a century?
Runs scored Runs needed to
Player 1 93

Player 2 97

Player 3 89

Player 4
99

Numbers are understood not by reciting them in order but by making associations in familiar contexts. Here the idea of a "century" of runs is used. Teachers could add other examples from children's lives to think about 3-digit numbers. Encourage them to speak about large numbers even if they cannot read or write them.

## Fill in the Blanks:

| 99-112 |  | 195-206 |  |
| :---: | :---: | :---: | :---: |
| Number <br> (in figures) | Number <br> (in words) | Number <br> (in figures) | Number (in words) |

## Samdala Shop

This is the jungle shop. Samdala gives things only in packets of tens, hundreds and loose items.

Find out how many packets of tens, hundreds and loose items each animal will take. Fill in the blanks.

Packets
Packets

$-$
242

In this chapter several stories and exercises are used to help children understand the decimal number system. The term 'place value', which often confuses children, has not been used at 3 all. Teachers could also find out about other locally used number systems, if any, especially while working in tribal communities.

How Many are these?

Moon Mama Counts his Starry Friends
I counted one star and kept one 1 card in my pocket.
1 for one star. 11 for 2 stars.
11111 for how many stars? $\qquad$
When I had 101 cards, I changed it with this card 10 . $11_{1} 111 \perp 11 \longrightarrow 10$
But my friends kept coming. So I had to count more stars. My pockets were getting full. So when I had 10 cards like this 10 I changed it with a 100 card.

1010101010

* 1010101010

But I have so many, many, friends that my pockets kept getting full. Just see how many cards I had.

Which cards will I have in my pocket if I have counted up to...
a. 19 $\longrightarrow 10^{1} 11_{11} 1_{11}$
b. 21
c. 95
d. 201

e. 260
f. 300 $\qquad$
g. 306
$\longrightarrow$
h. 344
$\longrightarrow$
i. 350
j. 400

When I had 1010 cards in my pocket, I knew I had counted 20 stars. Now you tell me the number of stars counted in each case. Write the answer in the blank space.

Guess how many starry friends I have in all... !!!

## (3) Gue and Take

I am Kittu. This is my home. Isn't it huge? It has

0325 CH 03 100 rooms. Help me in painting some of the rooms.
\& I start from room 2. I add 10 to 2 to reach room 12 and paint it. To add 10 to 2 , we can go all the way to the right to 10 . Then up to 11 , and one step right to 12 .
This is one way to go from 2 to 12 .
Is there a shortcut? Of course! Follow me.
We can jump up one row.
A jump from 2 to 12 is like taking $\qquad$ steps.

Now try one jump up from 14. $14+10=\underline{24}$.

Colour this room.
How will I go from 22 to 41 ? Jump from 22 to 42 .
Then one step left. We can write it like this.

$22+20=42$
$42-1=41$
How many steps did I go in all?
You could also go this way:
From 22 take one step left to 21.
Then two jumps up to 41 .
$22-1=21$
$21+20=41$

## Try these on Kittu's home:

a) 10 less than 34 is $\qquad$ $-$.
b) $53-20=$
c) 11 more than 31 is $\qquad$
d) 11 less than 66 is $\qquad$ .
e) $62+13=$ $\qquad$
f) 23 less than 89 is $\qquad$ .
g) 10 and 40 more is $\qquad$ _.

The $10 \times 10$ number grid is a useful aid for adding and subtracting two-digit numbers. Children should be encouraged to try these operations mentally using the grid as often as possible.
h) 9 added to 28 gives $\qquad$ .
i) The sum of 9 and 44 is $\qquad$ .
j) Reducing 98 by 34 gives $\qquad$ .
k) 4 and 37 more is $\qquad$ .

1) Take 35 away from 83. We get $\qquad$ .

## Find My Food

Hey! I have something more interesting for you.
Ma told me, there are sweets to eat in some rooms.
Help me find that room. The answers from the next page will help you find that room. Mark them in my home.

Adding Made Easy
Apuii bought apples for 37 rupees. Rama bought bananas for 21 rupees. The woman selling fruits said:

37 is 30 and 7
21 is 20 and 1
So 37 and 21 make 58.

Let us also try. Look at this sum.

| 26 <br> 20 <br> 20 <br> $+\boxed{6}$ <br> +40 <br> 20 <br> 20 <br> 40 <br> 6 <br> 60 <br> 6 |
| :---: |

69

The answer is 69.

(16) Can you do it another way? Say how.
$33+56=30+3+50+6$

$$
=80+9=89
$$

See if you can do the same with these sums.

$$
=80+3+6
$$

$37+22=30+7+20+2$ $\infty$

$$
=+\quad+
$$

$$
=
$$

$$
+0
$$

$$
=
$$

## MANGO CHILLI GAME

Roll a pair of dice and move by adding the numbers that come on the top of both the dices.
Keep a different coloured button for each player. If you reach a mango you go forward ( + ).
If you step on a chilli you have to go back ( - ). See who reaches back home first !

Now work out the steps in your mind. Write the answers directly in the boxes.

Once a baby lion lost his way in the jungle. He started crying and called out for his mother. An old deer took pity on him. He took him to his place. But the other deer got really scared. So did their other friends - rabbits, squirrels and birds. A lion among us! Oh, no! He will eat up our babies. The old deer said - don't worry. I will warn him about this. In the morning the baby lion thanked every one and started to leave. But a rabbit said - wait, he cannot go like this! Let us count to see if he has done any mischief. We should be 240 in all. Let's count.

In the chapter Fun with Numbers, children would have made token cards. The same token cards should be used for exercises in addition before children do written sums. there...

## $10 \quad 1$

5 Putting all the 1 s together, we get fifteen 1 s
Ten 1 s make one 10 and we are left with five 1 s
 So total number of

a
\# Similarly we add the number of birds and number of squirrels.
Number of

So together birds and squirrels were 162 , and deer and rabbits were 75 .

The old deer said - we were 240 in number, now how many are we in all?

## How Many Bulbs?

1. A factory made 270 bulbs on the first day.

On the second day it made 123 bulbs.
How many bulbs did the factory make altogether?

First day - 270 bulbs

Second day - 123 bulbs
 altogether?

Solution:

$$
100 \quad 10 \quad 1
$$

Bulbs made on first day

Bulbs made on second day Sum

$$
+
$$

270
$270+123$
Is the sum more than 350 or less than 350? I think..
270 and 100 is 370 ? The sum is more than 350.
2. A shopkeeper Rova had 153 candles. Para gave him 237 more candles. How many candles does Rova have now?

Work out the following story problems in the same way.
Read each problem and say it in your words.
Guess the answer before writing it.
A. A train compartment is carrying 132 people. Another compartment is carrying 129 people. In all, how many people are there in both the compartments?

B. Siami found 138 pebbles. Kima found 44 pebbles. How many pebbles did they find in all?

| 100 | 10 | 1 |
| :---: | :---: | :---: |
| +1 | 3 | 8 |
| + |  | 4 |

C. A teacher kept a note of which fruits students like in her school. This is what she found:

| Students | Oranges | Mangoes | Total |
| :---: | :---: | :---: | :---: |
| Girls | 136 | 240 |  |
| Boys | 128 | 243 |  |
| Total |  |  |  |

Find out:
(a) How many students in the school like oranges?
(b) How many students in the school like mangoes?

(c) Altogether, how many students are there in the school?
(d) Is the number of girls more than 350 or less than 350 ?

A.
(i) $345+52$
(iv) $643+345$
(ii) $492+29$
(v) $750+219$
(iii) $245+93$
B. 319
304
$+406+456$

+ 232

MIND BUS GAME :

## pu ZZ $_{\text {IE }}$

Addition is my best friend
We never have a fight
When I am done
Call out to him
And check if I am right

Two friends play this game. You look at the bus. Some people come in (+) and some leave ( - ) at each bus stop. How many are there in all? Solve in your MIND! Discuss your answer. The friend who gets the right answer first wins some -points. List down your points. Add to find who wins the most!

## WIN 5 POINTS $\frac{19-5}{19}$ $\frac{\text { 83A }}{6-15}$ $\square$ 7-3

Work out four different ways to write the numbers.

Can You Solve this PU $\prod_{1 \mathrm{E} \text { ? }}$
Write the numbers $1,2,3$, $4,5,6$ in the circles, so that the sum of the numbers on each side of the figure is 12 .

Find Mathani's Bag
Do all the sums mentally:

a) $75+20=$
95
g) $670+120=$
b) $90+60=$
150
h) $380+210=$
c) $25+30+3=$
i) $205+650=$
d) $9+40+31=$
j) $128+600=$
e) $500+200=$
k) $150+69=$
f) $400+350=$

1) $37+46+3=$

Find Mathani's bag and check

| 95 | 150 | 73 | 428 | 59 |
| :---: | :---: | :---: | :---: | :---: |
| 80 | 58 | 590 | 855 | 615 |
|  |  |  |  |  |
| 700 | 750 | 790 | 728 | 155 |
| 341 | 212 | 93 | 219 | 47 |
| 100 | 99 | 120 | 86 | 200 |

Draw a line through the numbers which are answers written in the boxes above.

## Card Game

One day Seni and Biaka were playing. Seni gave three number cards to Biaka. He arranged the cards in two ways.
 this way:
$120+30=150$
$30+120=150$

You can also play it. Here are the cards for you. Work out the combination. Place the cards in the right boxes.
a)

| 50 | 70 |
| :---: | :---: |
| + | $=$ |
| + |  |

| 50 | 20 | 70 |
| :--- | :--- | :--- |
| - |  | $=$ |
| - |  | $=$ |

| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| + |  | $=$ |  | - |  | $=$ |
|  |  | $=$ |  |  |  |  |
|  |  |  |  |  | $=$ |  |

## (4) Lang and Shorf

Lali is selling things at her father's shop.

0325 CH 04 A farmer comes to buy rope.

So, the farmer measures his arm with the rope and Lali gives him 7 times that much rope.

Measure your arm and your mother's arm. What is the difference?

Children should be encouraged to look around and see how lengths of different things are measured in different ways using local or non-standard units. For example, rope, garlands or cloth may be sold by the cubit, handspan, fingers, etc. They also need to do activities of measuring lengths (and distances) with their own body parts.

How Many?

* In how many steps will Dara cross the road?

* How many cups can be placed in a line on this table?
* How many pots can be placed to reach the tree branch?
* How many shirts can be hung on this wire?

## How Much is a Centimetre (cm)?

The matchstick is 4 centimetres long.
The die is 1 centimetre from every side.
The lizard is 13 centimetres long.
The leaf is $\qquad$ centimetres long.

The colour pencil is $\qquad$ centimetres long.

Now, look at a scale that you find in a geometry box. How many centimetres does it have? $\qquad$

The small scale that you mostly use in school is like this one.

Is it easier to start measuring from the 0 mark? Look at the things drawn near the scale and find out their lengths.

* What are the little lines on the scale used for?
* Look for things that are
* About 10 centimetres long
* Between 10 and 20 centimetres long
* Less than 1 cm long.
* Draw some of them here.

## How Big is My Hand?

Measure the length of your thumb and your little finger. Use the scale on this page. Which is longer? Thumb or little finger?

Bring a measuring-tape to your class.

Guess the length of different
 parts of your body and check if your guess is correct. You can use a scale, string, measuring-tape etc.

Think - How will you know the number of centimetres if you measure with a rope, shoe-string, thread etc.?
My measurement
Nose
Around the wrist

| Mround the head |
| :--- |
| measurement |

| Ear |
| :--- |
| Hand (tip of middle |
| finger to wrist) |

Compare your measurement with your friends'.

- Who has the biggest head and who has the smallest head?
$\qquad$ , $\qquad$
- Who has the longest hand (from middle finger to wrist)?

$\qquad$
* Which is longer? Your ear or your nose?
* Is any of your nails more than 1 centimetre long? $\qquad$

## Gibli and the Grains

Ant Gibli has to reach the grains. She is looking for the shortest road. Can you tell her which is the shortest?

Can you draw a road shorter than these? What is the length of that road? $\qquad$

It is more important for children to be able to get an estimate of a metre as related to known things, such as, their own heights, rather than do tedious exercises of converting metres to centimetres, etc. Children at this stage may not be able to perceive of bigger units such as a kilometre. They must be encouraged to speak of a kilometre in the context of a story or narrative. The Map of Agra is an exercise with a narrative involving children, with familiar images (icons) to help the initial understanding of mapping in 2 dimensions.

How Long is a Metre?

You must have seen shopkeepers measuring cloth with a metre rod.

- Use a metre rod and a rope.
* Make a knot at one end of the rope.
- Keep the metre rod with the rope.
- Mark 1 metre on the rope and make a knot there.
* Now the length between the two knots is 1 metre. This is your metre-rope.

If you don't get a metre rod use a measuring-tape and mark 100 centimetres on the rope. 100 centimetres are equal to a metre, so you get the metre-rope.

## Activity 1

* Find some things that look 1 metre long.
* Use your metre-rope to find which of these things are more or less than 1 metre.

| Name of the thing | More than <br> 1 | Less than <br> 1 |
| :--- | :--- | :--- |
| Length of table |  | - |
| Width of table | - | - |
| Width of door | - | - |
| Length of door | - | - |

## Activity 2

Some Class III children have marked a 1 metre height on the wall of their class.

You can also mark 1 metre on your class wall.

Now make a chart of the heights of your friends.
To measure the centimetres, you can use your small scale.

| Name | Taller/Shorter/ <br> Equal to 1 metre | How many centimetres more <br> or less than a metre |
| :---: | :---: | :---: |
| Shambhu | Taller | 4 centimetres |
|  | - |  |
|  |  |  |

## Centimetres or Metres?

Which of these will be in centimetres and which will be in metres?

* Width of a computer screen
* Length of a black board
* Height of a 1-year old child
* Length of a banana
* Waist of an elephant

* Height of a sugarcane
* Depth of a well
* Height of your mother
* Distance from classroom to school gate
* Length of your father's arm.

## Trip to Agra

Sangpuii and Rinliana are going with their family to Agra. They get down at Agra Cantt. Railway Station and take a rickshaw to Taj Mahal. After 3 hours, they start for Agra Fort, again in a rickshaw. In the afternoon they take a bus to go to Fatehpur Sikri.

MAP OF AGRA

Now look at the distances between these places (for kilometres we write km).

* Agra Cantt. Railway Station to Taj Mahal - 5 km
* Taj Mahal to Agra Fort - 2 km
- Agra Fort to Fatehpur Sikri-40 km

Now find from the map
*Which is farther from Agra Cantt. Railway Station —Taj Mahal or Fatehpur Sikri?

Which of these is nearer to the railway line:

* Babarpur forest or Taj forest?
- Agra Fort or Taj Mahal?

Which is closer to the river Yamuna:

* Taj Mahal or the Railway Station?

## The Long Tail Competition

The animals in this picture had a competition. The animal who had the longest tail won a prize. Now who do you think won the first prize and who won the second....? Just guess the length of the longest tail.

Make a Clapper

5

6

$\longrightarrow$

Have Fun with Shapes
Colour the clown following the directions given below :

How many triangles are there in the following figures?

Find the biggest rectangle in the figures given below.

## Edges and Corners

Mawitei and her 5 friends were playing a game. Ruata was blindfolded and asked to keep clapping as long as he wished while the others would move round a table. The moment Ruata stopped clapping, everybody would stop wherever they were. The child who was not at a corner would be out. Then she would be blindfolded.

a) Looking at the picture given above, can you tell who is out?
b) Where is Kima standing?
c) Can this game be played around a round table? Why?

Many things around us have straight edges. For example:

Other things have curved edges. For example:

a) Look around you and identify things with straight and curved edges.
b) Do the things with straight edges have corners?
c) Do the things with curved edges have corners?
d) Try to find things which have both straight and curved edges.

## Activity Time

1. Take a rectangular sheet of paper.
2. Count its corners.
3. Now fold one of its corners.
a) How many corners does it have now?
b) How many corners will you get by folding
i) 2 corners
ii) 3 corners

iii) 4 corners
c) Can you fold this paper in such a way that it has only three corners? You are allowed only two folds.

What shape will you get?
4. Repeat the activity with a square sheet of paper.
5. Can you fold all the corners of the square sheet in such a way that the number of corners remains unchanged?
Look at the following table and tick ( $\checkmark$ ) the names of things that have corners. Also count the number of edges and corners in each of them.

| Name of <br> thing | Whether it has <br> corners | Number of <br> edges | Number of <br> corners |
| :--- | :---: | :---: | :---: |
| Die Yes | 8 |  |  |
| Ball |  |  |  |
| Eraser |  |  |  |
| Egg |  |  |  |
| Sheet of paper |  |  |  |

In the following figures, tick $(\checkmark)$ those which have corners.
Do these figures have curved lines?

Using only straight lines, can you draw a figure which has no corners?

## Tangram

The tangram is an old Chinese puzzle. From the pieces of the tangram, we can make many shapes of animals, people and things.

At the back of the book you will find a square like the one in this figure. Cut it out carefully and cut the pieces. This set of five pieces is called the 5-piece tangram.

Use these five pieces to make the following figures:

1. How many triangles do you have in your set? Are all of them equal in size? Find out.
2. Use the two small triangles in the tangram set to get the following shapes:

(1)

(2)

(3)
3. Which two pieces of the tangram set are exactly same? Find out.
4. Take pieces 4 and 5 from the set and find out on which side of the triangle you can join the other piece.
5. Find matching sides among the following pairs of pieces.
a) Pieces 1 and 2
b) Pieces 2 and 4
c) Pieces 1 and 5
d) Pieces 2 and 5

## The 7-piece tangram

Here is the picture of a seven-piece tangram.

You can cut out these pieces and put them together in different ways to make some very interesting shapes.

Try making these shapes.

Now try making the following shapes using only the pieces written here: i) Use only triangles

iii) Use only two triangles

ii) Use pieces 1, 2, 3 and 5

iv) Use pieces 1, 2, 3, 4 and 5

## Weaving Patterns

Zova and Mami went to the market with their aunt．They saw many rugs（durries）．

洸 Which geometrical shapes can you identify in these borders？ Draw them in your notebook．
米 Is any shape repeating in a particular pattern？Which ones？
米 Are the shapes made of（i）Curved lines
（ii）Straight lines
（iii）Both curved and straight lines．
米 Look at your clothes，your mother＇s saris／shawls，rugs and mats．Can you identify some patterns？Draw them in your notebook．

## Floor Patterns

Have you ever seen a floor which has designs?

Do you know how these designs are made? These designs are made by covering the floor completely with small tiles that fit into each other without any gaps.. For example look at the shape of this tile and see how it fits.

Now look at this tile with six sides.

See how tiles of this shape can cover the floor completely without any gaps.

1. Among the following, can you match the tiles with the designs that they will make on the floor? Draw lines to match.

You can also make your own tiles and use them to make your own tiling patterns. You will find some such tiles at the end of the book that you can cut out, trace and colour.
2. Complete the following tiling pattern.

3. Complete this pattern. Compare it with the pattern on page 68 which also uses six sided shapes. What is the difference between the two?

4. Khumi and Hriata live in Agra. One day they went to see the Taj Mahal. The floor had the pattern shown below:

What do you think? Discuss with your friends.

## Tiling Time

The patterns below are made from this tile.

In this pattern three colours have been used to make it look like steps.

By using two colours it becomes a different pattern of blue and yellow flowers.

Use different colour combinations to make your own patterns.

Have you seen this shape in any other design - on a wall, a dress, on a basket, a mat etc.?

## Treasure Hunt

Frank and Julie's mummy has hidden a surprise gift for both of them. But she wants them to find out through a treasure hunt. She has written some instructions here. Can you help Julie and Frank in finding their gift?
a) Start from the tallest tree.
b) Go forward on the pathway.
c) From the sixth tile, turn left.
d) After moving a few steps again you will find a plant on your right hand side.
e) Colour the dress of the child playing closest to this plant.
f) Start moving again from the plant.
g) On the fourth tile, turn left again.
h) On the way, you will find the corner of the fourth tile is broken.
i) You will find a bat and a ball lying on the ground. Don't pick them up, just circle them.
j) Move ahead and turn right.
k) You will find a mango tree. A few mangoes can be seen on the tree. Colour 11 mangoes on the tree.

1) Also draw some grass near the mango tree and start moving again on the pathway.
$\mathrm{m})$ When you go straight, you will find a house.
n) Behind that house there is a bag. Open it and you will find something sweet in it! Can you tell what their mother has kept in the bag?

Understanding of space will be facilitated if the treasure hunt worksheet is done in the class. This task will enhance skills of children in identifying positions (up, down, front, behind), distance (near, far), size (tall, small), corners and shapes. It will help if more such treasure hunts are given to children as an activity.

## (6) Fun with Give and Take

Cricket Match
In a cricket match, Sri Lanka made 235 runs.

India has made 123 runs. How many more runs does India need to win?

To win India must make 236 runs.
Runs India needs to win:
$236-123=?$

100101

Runs by India - 123

Runs needed

$$
\begin{array}{lll}
1 & 1 & 3
\end{array}
$$

## Try it Yourself

Liani had ₹ 368 in her purse.
She bought a book for ₹ 123.
How much money is left in her purse?
Money left in her purse is ₹ 368 - ₹ 123 =?

The teacher should discuss with students which number is to be placed above and why.

## Can You Help Nutei?

Nutei's mother sent her to the market to buy some things. She gave her ₹ 245 . Nutei bought 1 kg ghee for ₹ 127 . The shopkeeper gave her back ₹ 98 .
(Kilogram is written as kg.)
Did the shopkeeper give her the right amount?

Let's find out.

$\left.\begin{array}{l|lll|llllll}\hline \begin{array}{l}\text { Money Nutei } \\ \text { had }\end{array} & 2 & 4 & 5 & 100 & 10 & 10 & 1 & 10 & 10\end{array}\right]$ 1 1

## 11414 <br> 114

Now take away 10 s . Only one 10 left.
$100 \quad 10 \quad 1$

11111 1.1

The shopkeeper had to give Nutei ₹ 118 .
How much more money should the shopkeeper give Nutei?

## Practice Time

1. Baby tortoise is 33 years old. Mummy tortoise is 150 years old. How much younger is Baby tortoise than Mummy tortoise?

Age of Mummy tortoise: $\underset{\text { 150 years }}{ }$
Age of Baby tortoise: 33 years
Baby tortoise is 117 years younger than Mummy tortoise.

| 100 | 10 | 1 |
| :---: | :---: | :---: |
| 1 | 4 | 1 |
| -5 | 0 |  |
| - | 3 | 3 |
| 1 | 1 | 7 |

2. Avena has read 69 pages of a story book. Muani has read 95 pages of that story book. Who has read more pages and how many more?

Teachers should motivate students to decide which operation they have to use to solve a problem. More such exercises can be given where students decide the appropriate operation.
3. Rini noted the electricity meter readings of her house. Last month's reading was 118 units. This month's reading is 193 units. How much electricity did she use in one month?

This month's reading $\qquad$
Last month's reading $\qquad$

She used $\qquad$ units of electricity.
4. Khumi bought a shirt for ₹ 125 and trousers for ₹ 165 . How much money did she spend altogether?

Bought a shirt for ₹ $\qquad$
Bought trousers for ₹ $\qquad$

| 100 | 10 | 1 |
| :---: | :---: | :---: |
| 1 | 6 | 5 |
| 1 | 2 | 5 |
|  |  |  |
|  |  |  |

She spent ₹ $\qquad$ altogether.

5. Solve the following:

| 17 | 14 | 39 | 12 | 86 |
| ---: | ---: | ---: | ---: | ---: |
| $-\quad 3$ | $+\quad 3$ | -10 | +24 | -58 |

139
237
+213
325
474

- 110
- 204
- 136

6. Check your answers yourself:

$\left.\begin{array}{rrr}2 & 3 & 6 \\ -1 & 1 & 4 \\ 1 & 2 & 2\end{array}\right] \quad \begin{array}{rrr}1 & 2 & 2 \\ +1 & 1 & 4 \\ 2 & 3 & 6\end{array}$

Check Rami's subtraction using addition. Give her a $\sqrt{ }$ for every right answer.

$-$| 3 | 5 | 6 |
| :---: | :---: | :---: |
| 2 | 4 | 7 |
| 1 | 1 | 9 |

7. Fill in the missing numbers in the coloured boxes.

$-$| 7 | 8 |
| :---: | :---: |
| 3 |  |
|  | 5 |

$-$| 2 | 1 |  |
| :---: | :---: | :---: |
| 1 |  | 7 |
|  | 3 | 2 |

|  | 6 |
| :---: | :---: |
| 3 |  |
| 6 | 0 |

$-$|  | 4 | 4 |
| :---: | :---: | :---: |
| 2 | 3 | 8 |
| 2 |  |  |

The teacher should encourage students to discuss and correct the wrong answers. Children love to correct others' mistakes (for a change!) and also learn from this process.

## Let's Deliver Letters

Postman Uncle is ill todav. Let's deliver the letters for him.

Write the correct room numbers on the letters. Then find the rooms in the above building and circle them.

The teacher should encourage students to solve the problems mentally using the above chart.

Find the Missing Numbers
Look at the number patterns. Write the missing numbers.
a) 100, 200, 300, $\qquad$ 600, $\qquad$
b)

c) $50,100,150,200$,
d)

e)

f) $280,260,240$, $\qquad$ , ___ , _ _
g) $125,150,175,200$, $\qquad$ 250, $\qquad$

1. Mami's pencil is 15 cm long. Julie's pencil is 8 cm long. Whose pencil is longer? How much longer?
2. Ask your Papa or Mummy Price of 1 kilogram salt Price of 1 kilogram sugar Which one is more costly? How much more does it cost?
3. Ajay cooked chapatis in 25 minutes. Then he made daal in 15 minutes. How much time did he take to cook both things?
4. Chali sells school sweaters. In 2 days she sold some red, blue and grey coloured sweaters.

| Sweaters sold on first day | 38 | 66 | 74 |
| :--- | :--- | :--- | :--- |
|  |  |  |  |
| Sweaters sold on second day | 40 | 23 | 89 |

Look at the above and answer the following:
(a) How many grey sweaters did Chali sell in 2 days?
(b) Did she sell more red sweaters than blue sweaters in 2 days?
(c) How many red and grey sweaters did she sell on the first day - more than 120 or less than 120 ? Tick ( $\checkmark$ ) the right answer.
more than 120 $\square$ less than 120 $\square$
(d) How many sweaters in all did she sell on the second day more than 140 or less than 140 ? Tick ( $\checkmark$ ) the right answer. more than 140 $\square$ less than 140 $\square$

## 5. Is Sangtei right?

Sangtei went to the market with her grandpa.

She looked at the prices and said to her grandpa -
(a) Ghee is ₹ 102 rupees costlier than biscuits. $\square$
(b) Price of oil and ghee altogether is more than ₹ 200.
(c) Price of ghee and 10 kg rice is less than ₹ 300.
(d) Oil costs ₹ 40 more than a pack of biscuits. $\square$ Is Sangtei right? Mark ( $\checkmark$ ) or ( ) in the box.

Can you find this without using paper and pencil?

## Story Problems

Neihi and Sawma were making story problems. Neihi said - 13 boys and 14 girls in a class. Sawma, can you make a problem on it?

Sawma wrote There are 13 boys and 14 girls in a class. How many students are there altogether?

You can also make story problems with your friends. Look at each picture and the words next to it. Write your problem below it.

B. We have our mid-day meal in 20 minutes and play for 15 minutes.

C. The post office is 1 kilometre from Saia's home and 2 kilometres from his school. .

## Count to Subtract!

Dawngi bought 4 dozen (48) bananas and gave one to each of her friends. 13 bananas were left. How many friends got a banana?

As you know, this can be found by counting forward from 13. It is easier to count in jumps of 10 . You can also use Kittu's home shown on page 29 to solve these problems.

$$
48-13
$$

$10+10+10+5=\underline{35}$
So $48-13=35$
A. $56-37=$

B. $60-45=$ ?

$10+10-1=$ $\qquad$

$5+10=$ $\qquad$
So $60-45=$ $\square$

So $56-37=$ $\square$
C. $80-59$
D. $85-63=$ $\square$

$\qquad$ $+$ $\qquad$ $+$ $\qquad$ $=$ $\square$
E. $84-69=\square$
F. $60-20=\square$
G. $90-50=\square$

## All the King's Horses....

Once there was a king who could count only up to 9 . Up to what number can you count?

The king loved horses. But he could never count all of them. He kept them in such a way that he needed to count only up to 9 from each side.

How many horses in all did the king have? $\qquad$

One day a visitor with 4 horses came there. It was getting dark so he wanted to stay there at night. But the horse-keeper was scared. If the king saw these extra horses he would be very angry! The visitor said - do not worry. The king will never know. So he arranged the horses like this:

How many horses are there now? $\qquad$

At night the king came to count the horses. Along each side he counted 9 horses. Ah! That's fine - he said. Then he happily went to sleep.

In the morning the clever visitor tried another trick. He took out his own 4 horses. But he also ran away with some of the king's horses. He left the king's horses standing in this way.

The silly king did not find any horse missing. Can you help him?

| 4 | 1 | 4 |
| :--- | :--- | :--- |
| 1 |  | 1 |
| 4 | 1 | 4 |

How many horses are now left? $\qquad$ How many of the king's horses were taken away?
(Based on a Tamil folk story from the book "Numeracy Counts!")

(C)
What numbers are we?
If you add us both you get 100 .
The difference between us is also 100 .

Ulta Pulta Time - This is a story with topsy turvy time.

... In two days $\qquad$ it is on the ground! Oh, how sad! The mango is still not fully ripe. It needed one more year $\qquad$ to become sweet. Suddenly Siami's sister calls out - Are you still not hungry? Has your stomach clock gone to sleep? Come and eat hot upma for dinner $\qquad$
Wasn't that funny? You must have guessed that the coloured words are wrong. Choose the correct word from the box given below and write it next to the wrong word.

| days | rises | seconds | morning |
| :--- | :--- | :--- | :---: |
| breakfast | moment | minutes | week |

## How Long does it Take?

Have you seen someone knitting a sweater? Or someone weaving a cloth? Do try to find out from a potter how long it takes to make a pot. Also tell us if you take hours or minutes to have your bath! (Is it years since you last had a bath? Ha, ha!)
Think of many different things that can take different times. Make your table as long as
 you can.

| Takes minutes <br> a bath <br> a <br> to boil milk | Takes hours | Takes days |
| :--- | :--- | :--- |
|  | to stitch a shirt | to knit a sweater |
|  | a school day | to weave a sari |
| ber a banana to |  |  |
| become ripe |  |  |

Think of some other things, some faster and some slower. Make a long list.

Takes seconds
to blink my eyes to snap my fingers to gulp my medicine

for fruit to fall from a tree
Takes months
to grow wheat (from seed to big plant)
to change from summer to winter
for a baby to come out of its mother's stomach

## Clap！Clap！－Before you Catch

## Play this game

Throw a stone into the air．Clap once before you catch it．

Now try to clap 2 times before the catch．

Try more claps．How many times can you clap before you catch the stone？

Ta Thai－Different Claps
Clap 2 times and say 12
Keep clapping $12,12,12$ ，
or say Ta Thai，Ta Thai，Ta Thai，．．．．．．．．
Also stamp your feet Left Right，Left Right，Left Right，．．．．．
Now clap with three beats 123 ， 123 ， 123 ，．．．．．．
Say：Ta Thai Tut，Ta Thai Tut，Ta Thai Tut，．．．．．．．
Can you stamp your feet Left Right Left，Left Right Left，．．．．．．
How many of you can speak and stamp at the same time？

## Find Out

Have you heard people playing a tabla or the drums？Find out a few different beats they play． Also ask what＇bols＇they say for the beats they play．

(1) $2 / 5 / 2002$ shows that Lalhmangaihi was born on 2
$\qquad$ in the year 2002.
(2) How old will Lalhmangaihi be on 2 May 2008?
(3) How old will she be in the year 2052? $\qquad$
(4) On what date will she be eight years old? Write in numbers.
(5) How many months old was Lalhmangaihi on 2 August 2002? $\qquad$
(6) How many years old is Lalhmangaihi now?
(7) After how many months of her birth was the certificate issued? $\qquad$
(8) What is the registration number of her certificate? $\qquad$

## Find Out

When were you born?
Write your date of birth in numbers. $\qquad$
Do you have a birth certificate? Ask your parents and make one for yourself.

GOVERNMENT OF MIZORAM DEPARTMENT OF ECONOMICS AND STATISTICS BIRTH CERTIFICATE
(Issued under Section 12/17)
This is to certify that the following information has been taken from the original record of birth which is in the register for (local area) of R.D Block $\qquad$ of district $\qquad$ of State, Mizoram.
Name
Date of Birth $\qquad$ Sex $\qquad$ Place of Birth $\qquad$ Name of Father
Name of Mother
$\qquad$
Registration $\qquad$ Date of Registration $\qquad$

Signature of Issuing Authority of Births and Deaths

Mizoram

## Calendar

Let us look at the calendar for the year 2018.
米 How many months does a year have？
洸 List the months which have 30 days． $\qquad$
$\qquad$
米 List the months which have 31 days．

米 How many days does the month of February have？
米 How many days makes a week？ $\qquad$
洮 How many weeks are there in July？ $\qquad$ Is it true for all the months？ $\qquad$
洸 In which month did you come to Class III？
洸 Make a circle on these dates in the calendar： 26th January

## 14th November

31st December．
Is there something special about these dates？

Fill in the blanks with the correct year：
1．Which year was it two years back？
$20172020 \quad 20192016202$
2．In which year were you in Class II？
3．Which year will be the next year？ $\qquad$
4．Which year will come after 3 years？ $\qquad$

This chapter encourages children to look at different cultural contexts in which the idea of elapsed time occurs in their lives．It is more important for them to be able to develop an intuitive estimate of seconds，minutes，months etc．than to actually measure．The chapter also helps them to understand the use of a clock and calendar through interesting exercises．Teachers could create more such exercises related to number patterns and symmetries．

Name of the festival
Diwali
Republic Day
Independence Day
Gandhi Jayanti
New Year
Idul-I Fitr
Teacher's Day
Mizoram State Day
Christmas Day

Date Day
October 21
January 26
August 15
October 2
January 1
October 23
September 5
February 20
December 25
** Arrange the festivals in the order in which they come in the year.

2. $\qquad$
3. $\qquad$
4. $\qquad$ $-$
5. $\qquad$ --
10. $\qquad$
Which festival comes in the beginning of the year?
$\qquad$
Which festival comes at the end of the year?
$\qquad$
6. $\qquad$
7. $\qquad$
8. $\qquad$
9. $\qquad$

## Calendar Magic

Here is the calendar for the month of February 2019.
Let us mark a square on the calendar and see some magic.

## February 2019

| $S$ | $M$ | $T$ | $W$ | $T$ | $F$ | $S$ |
| ---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  |  |  |  | 1 | 2 |
| 3 | 4 | 5 | 6 | 7 | 8 | 9 |
| 10 | 11 | 12 | 13 | 14 | 15 | 16 |
| 17 | 18 | 19 | 20 | 21 | 22 | 23 |
| 24 | 25 | 26 | 27 | 28 |  |  |

Which is the number in the centre of the square? $\qquad$
Join three numbers by drawing a line. The line must pass through the number at the centre.

How many such lines can you draw?

Add the three numbers on each of these lines.
What do you notice?

$$
\begin{array}{r}
5+13+21= \\
6+13+20= \\
19+13+7= \\
12+13+14=
\end{array}
$$

洸 Now look at the calendar of 2018. Also look for the present month and draw any similar square in your notebook. Does the magic work for these?

米 Is this magic possible on a $10 \times 10$ number chart? Go to the chapter 'Fun with Numbers' and check.

See if this magic works for other lines which have five numbers. What about five numbers on a slanting line? Try this trick with your family and friends.
Can you find other magic patterns in the calendar?

## Complete the Calendar

## for August 2018

| $2018$ |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Sunday | Monday | Tuesday | Wednestay | Thursday | Friday | Saturday |
|  |  |  | 1 |  | 3 |  |
|  |  | 7 |  |  |  |  |
| (haididey) |  |  |  |  |  | 18 |
| $6$ |  |  |  |  | 24 |  |
|  |  |  |  |  |  | 1 |

Colour all the Sundays in red.
On which day does this month end?
Write the number of days in this month. $\qquad$
What day is it on 13th August? $\qquad$
What is the date on the second Saturday? $\qquad$ Is the 21st a Sunday? $\qquad$
What is the day on the 29th? What will be the date on the same day next week? $\qquad$
How many Thursdays are there in this month? $\qquad$

## Find Out!

Which months in the calendar (2018) have 5 Sundays?
Is there any other day in any month which comes 5 times?
Can there be 6 Sundays in a month? Why?

Ask such questions for the current month and also other months. Encourage students to discover more patterns through a calendar.

## The True Story of Peki

## My Time Line

My name is Peki. One day, when I was 5 years old I had climbed an orange tree. But the branch broke and I fell down. I broke my foot and could never go to school. My foot still hurts in winter.

We shifted to another village when I was 10 years old. I used to miss my village very much. I got married at the age of 20 years. My first daughter was born three years after my marriage. Later, I had three more children when I was $25,28,31$ years old.

I was very busy with my farm and housework. Unfortunately, my husband fell ill and died when I was 38 years old. After 2 years of my husband's death, I started learning to read and write very well when I became 45 years old. Now, I am 50 years old. I live happily with my grand children.

Some things that happened in her life are given below．Mark these on her time line．For example，when she was 5 years old Peki broke her foot．A is marked at 5 on the time line．

A．Broke her foot
B．Lost one goat
C．Got married
D．Had her fourth child
E．First saw a police station
F．Learnt to read and write
G．Eldest daughter got married

米 Mark on the time line when she was born．
米 In the blank box draw a picture of Peki as a new born baby．
米 Make your own time line．Ask people around you and mark at least one thing that happened in each year of your life．

|  | I |  | I | I |  | I | I |  | I |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| ge in years |  |  |  |  |  |  |  |  |  |

洸 Make time lines of people you admire．These can be from among your family，friends，teachers，etc．

She is studying in school.

$1 o^{\prime}$ clock in the afternoon

She comes back from school.

She takes lunch with her brother and grandmother.

She plays with her friends.

9 o'clock $^{\prime}$
at night

She listens to a story from her grandmother before she sleeps.

Five-thirty in the evening

## $* * * * * * * * * * * * *$ (8) Who is Heavier?

## Gur (jaggery) and Groundnuts

0325CH08

Shabnam loved to eat jaggery (gur) and groundnuts.
One day she bought 1 kg of jaggery and 1 kg of groundnuts.
(You know that kilogram is also written as kg.)

米 Are the groundnuts really more than the jaggery (gur) in weight or do they just look more?

(2) 1 kg peas or 1 kg potatoes?

Go to the market and check if your guess is right.
**********************

## Pumpkin Tomato 'Panga'

This is the playground where tomatoes come to play every day.
They love playing on the see-saw. One day a big pumpkin comes and sits on one side of the see-saw. When he does not get up for a long time, the tomatoes decide to sit on the other side and lift the pumpkin up so that he falls off.

The little tomatoes start climbing on to the other side...1, 2, 3, 4, 5 ....... 25. Huh! The pumpkin is still sitting and laughing.

So, the big tomatoes decide to help. The little ones get down and

make way for the fat ones. $1,2,3,4$ $\qquad$
Yeah! The pumpkin is up in the air. It shouts - Bring me down, bring me down please!

[^0]米 How many small tomatoes do you

think could lift the pumpkin up？
－Ten
－Twenty
－Forty

米 How many big mangoes can balance the pumpkin？

米 How many pumpkins can balance you on the see－saw？

米 Name some of your classmates who you think weigh
（a）Almost the same as you
（b）More than you
（c）Less than you

洸 How many books can you lift on one hand keeping your arm straight？
＊＊＊＊＊＊＊＊＊＊＊＊＊＊＊＊＊＊＊＊＊＊

## Double her Weight

Kungi's parents have a different way of celebrating Independence Day because Kungi was born that day. They buy sweets double of Kungi's weight and distribute them among poor people.

When Kungi was born, she was 3 kg . Today is Independence Day and Kungi is 5 years old. She is 28 kg now.

洸 Now guess her weight and the amount of sweets her parents distribute every Independence Day.

| Kungi's age | Kungi's weight |
| :--- | :--- |
| At birth | 3 kg |
| 1 year old | 9 kg |
| 2 years old |  |
| 3 years old | 17 kg |
| 4 years old |  |
| 5 years old | 28 kg |

Amount of sweets

$$
3+3=6 \mathrm{~kg}
$$

$\qquad$
$13+13=26 \mathrm{~kg}$
$\qquad$
$\qquad$
$\qquad$

## ****statas

Siama heard about a new dish on the radio. He wants to try making it. When he notes down how to make it, he gets confused.

This is what he notes down -
(1) Pour 2 spoons of water in the pot
(2) Boil the water and add

- 1 pinch of daal
- half $\mathbf{k g}$ red chilli powder
- 1 bowl salt
(3) Now put a spoon of rice
(4) Add 2 peas and 8 glasses of mustard seeds
(5) Finally add 1 kg of onions

Mix everything and boil for 15 minutes.
But Siama feels there is something VERY wrong in the amounts of everything!!!

消 Help him match the things with their right amounts.
$\left[\begin{array}{l}\text { rice } \\ \text { daal } \\ \text { peas } \\ \text { water } \\ \text { onions } \\ \text { salt } \\ \text { mustard seeds } \\ \text { red chilli powder }\end{array}\right.$
**********************

## Activity Time

A. Make a list of things bought at your home. Find out how much of each thing is bought at one time. These things can be rice, oil, chilli powder, sugar, milk, onions, ginger, etc.

(116)
**********************
B. Guess their weights and match.

Less than 1 kg
More than 1000 kg
80 kg
2 kg

C.

i) Your school bag
ii) Geometry box
iii) A brick
iv) A big pumpkin

v) Your pair of slippers/shoes

Bring a balance and a 1 kg weight to class. Check if your guess was right.

| in | inse your balance to find which of the following is heavier - |
| :--- | :--- |
| iii) Your Maths book or Hindi book bottle or a cricket ball |  |
| iv Your bag or your friend's bag |  |
| E. Weigh 1 kg of mud or sand. Divide it equally into 2 bags. Use |  |
| the balance to check if both the bags have equal weight. |  |

Each bag of mud is your half-kg weight. Use it to weigh some other things around you.

## 米 Make a list of

i) Things weighing less than half kg.
ii) Things weighing more than half kg.

Different activities will help children to guess and estimate weights of familiar things they see at home, at the grocery shop, etc. Guessing the weights of animals is an enjoyable exercise and helps them get a feel of larger weights. Teachers must bring a balance to class and give them a chance to weigh things themselves.
**********************

Look for Weights and Balances
Make a trip to your nearest junk dealer, vegetable shop and grocery shop. Have a look at the weights they use. Find out:
i) Who uses the biggest weight?
ii) Who uses the smallest weight?

Have you seen any of these balances?

In which shop would you find the following types of weights? Discuss with your friends.

0325CH09

## Leggy Animals

There are 5 goats.
How many legs altogether?
$4+4+4+4+4=20$
or 5 times 4 is 20
or $5 \times 4=20$

How many spiders?
One spider has $\qquad$ legs.
In all, spider legs are 3 times $\qquad$
or $++=$ $\qquad$
or $3 \times$ $\qquad$ $=$ $\qquad$

Do you know this leggy fellow?
This is an octopus.
It lives in the sea.
It also has 8 legs.
So how many legs altogether do 5 octopuses have?

$$
+\square+\square+\square=
$$

$\qquad$
or 5 times $\qquad$ $=$ $\qquad$ or $5 \times$ $\qquad$ $=$ $\qquad$

## 

How many flowers in a flower bed?
It has 4 columns. Each column has 6 flowers. So altogether the flower bed has 4 times 6 flowers,

$$
\begin{aligned}
& 6+6+6+6=24 \text { or } \\
& 4 \times 6=24
\end{aligned}
$$

Let's try another way. The flower bed has 6 rows. Each row has 4 flowers. Altogether the flower bed has 6 times 4 flowers,
$4+4+4+4+4+4=24$ or $6 \times 4=24$

$\qquad$
$\qquad$ = $\qquad$ bottles

## How many eggs?

$\qquad$ times $\qquad$ $=$ $\qquad$ eggs

In the same way, how many bottles are these?
times

# K <br>  

## Practice Time

A. Rewrite using the + sign.

$$
2 \times 5 \text { is } 2 \text { times } 5 \text { or } 5+5
$$

$4 \times 18$ is 4 times $\qquad$ or $\qquad$ $+$ $\qquad$ $+$ $\qquad$ $+$ $\qquad$
$3 \times 20$ is $\qquad$ times $\qquad$ or $\quad]_{+}^{+}+$ $\qquad$
$8 \times 9$ is $\qquad$ times $\qquad$ or $\qquad$ $+$ $\qquad$ $+$ $\qquad$

B. Tell how many times!

C. Ramchhana bought 4 packets of biscuits. Each packet has 4 biscuits. How many biscuits did Ramu buy?
D. There are 12 desks in a classroom. Each desk has 4 legs. What is the total number of legs of the desks?

E. Sabiha brought home 3 bunches of flowers. Each bunch has 4 flowers. How many flowers were there?
F. One rail coach has 8 wheels. How many wheels in all in 6 coaches?

> After children attempt word problems, there should be a discussion on how they arrived at their answers. This will help children develop a conceptual understanding of multiplication.
How Many Times 2?

## 

(125)

Try jumps with seven steps

Mimi had some sticks. She arranged them like this:

1 time $5=5$
2 times $5=10$
3 times $5=15$
4 times $5=20$
Then she counted how many times the sticks were crossing each other. She found that 4 times $5=4 \times 5=20$

Let's try making a 2 times table with sticks:

$$
\begin{array}{r}
1 \times 2=2 \\
2 \times 2=4 \\
3 \times 2=6 \\
4 \times 2= \\
5 \times 2= \\
6 \times 2= \\
7 \times 2= \\
8 \times 2= \\
9 \times 2= \\
10 \times 2=
\end{array}
$$

Children can be given 16 and 24 sticks to arrange and encouraged to try different arrangements like $4 \times 4,2 \times 8,8 \times 2$ for 16 sticks and $12 \times 2,8 \times 3,4 \times 6,6 \times 4,3 \times 8,2 \times 12$ for 24 sticks.

## 

## Now draw sticks to make the multiplication table of 6:

## Shopping with Tables

How much do these things cost?

3 pencil boxes cost $\qquad$ rupees.

10 pencil boxes cost $\qquad$ rupees.

9 balloons cost $\qquad$ rupees.

(129)
5 toys cost $\qquad$ rupees.
7 face masks cost

## Practice Time

## A. Complete the following:

$\qquad$ rupees.
B. Look at the patterns and complete them.

3, 6, 9, $\qquad$ , $\qquad$ .

2, 4, 6, $\qquad$ , $\qquad$ , $\qquad$ .

10, 20, 30, $\qquad$ , $\qquad$ , $\qquad$
$4,8,12$, $\qquad$ , $\qquad$ , $\qquad$ —.
$5,10,15$, $\qquad$ , $\qquad$ , $\qquad$
30, 60, 90, $\qquad$ , $\qquad$ _.

C. Complete the multiplication tree

*
c.
*

## D．How many in all？

業 The almirah has 4 shelves． There are 5 books in each shelf． How many books are in the almirah？

$4 \times 5=20$ books

粦 A shirt has 5 buttons． How many buttons would 3 shirts have？
类 There are four fans．Each fan has 3 blades．What is the total number of blades in all？

A box contains 6 apples．How many apples in all will seven boxes have？

How many corners would 4 triangles have？

## E．Some multiplication facts：

$$
\begin{aligned}
& \% 8 \times 3= \\
& \% 3 \times- \\
& \% \ldots \times 6=36 \\
& \% \ldots \times=42 \\
& \% 10 \times \ldots= \\
& \% 5 \times-=40 \\
& \because \ldots \times 9=36 \\
& \because-{ }^{\times}=\quad 54 \\
& \%-\ldots 7=28 \\
& \therefore 5 \times-=35
\end{aligned}
$$

## 

| one time one is | $1 \times 1=1$ |
| :--- | :--- |
| two times one is | $2 \times 1=2$ |
| three times one is | $3 \times \ldots=\square$ |
| four times one is | $=\square$ |
| times one is | $=\square$ |

## Multiplying Big Numbers

A. Two toffees were given to each student in the class. If there were 34 students, how many toffees were given in all?

Total students present $=34$
Each student gets 2 toffees.
So total number of toffees given is $34 \times 2$.

133

## 秉東

B．In a picnic 4 fruits were given to every student．The number of students was 23 ．Find out the total number of fruits given．

Number of students in the picnic $=23$
Fruits given to each student $=4$
Total number of fruits $=23 \times 4$

Let us try it we can do this by Bharti＇s method．

Adding 80 and 12 gives 80

The activities given in this chapter are designed to develop children＇s conceptual understanding of multiplication．The standard method for multiplying larger numbers may be efficient，but teaching it too early may actually hinder learning．The method given here builds on children＇s growing sense of two－digit and three－digit numbers．Children should also be encouraged to estimate the result of the operation．

## Practice Time

## A. Multiply:

| \& $22 \times 3=$ | 8. $43 \times 2=$ |
| :---: | :---: |
| $\because 21 \times 4=$ | \% $24 \times 2=$ |
| $\because 11 \times 5=$ | \% $30 \times 5=$ |
| $\because 20 \times 4=$ | \% $23 \times 9=$ |
| $\therefore 26 \times 4=$ | \% $38 \times 2=$ |
| $\because 25 \times 3=$ | $\therefore 24 \times 5=$ |
| $\% 35 \times 3=$ | $48 \times 4=$ |
| \% $32 \times 5=$ | $58 \times 2=$ |

## B. First guess the answer and then calculate:

粦 A flower has five petals. A bunch of flowers has 13 flowers. How many petals are there in the bunch?

粦 A book has 64 pages. What will be the total number of pages in 8 such books?

Students stand in rows in the assembly. There are six rows of students. Each row has 17 students. How many students are there?

业 A design has 3 flowers in it．A piece of cloth has 17 such designs．How many flowers will be on the cloth？

## How many in 23 dozen？

Many things are sold by the dozen．For example，bangles and bananas are often sold by the dozen．
1 dozen bananas means 12 bananas．

So 23 dozen bananas is
$23 \times 12$ bananas．

Next Biaki wrote

|  | 20 | 3 |
| :---: | :---: | :---: |
|  | $20 \times 10$ <br> $\mathbf{2 0 0}$ | $3 \times 10$ <br> $\mathbf{3 0}$ |
|  | $20 \times 2$ <br> $\mathbf{4 0}$ | $3 \times 2$ <br> $\mathbf{6}$ |

So 23 dozen bananas is 276 bananas.

Now try doing $43 \times 13$
43 is 40 and 3
13 is 10 and 3

We write the numbers in the boxes as shown.

Add the numbers in the boxes:

| 400 |
| ---: |
| 120 |
| 30 |
| $+\quad 9$ |
| 559 |

So $43 \times 13=559$

## Practice Time

First guess the answer and then check it by calculating :
$\qquad$
$51 \times 13=$ $\qquad$
$73 \times 11=$ $\qquad$
$25 \times 36=$ $\qquad$
$\qquad$
$12 \times 14=$ $\qquad$

## Multiplication Patterns

A. $9 \times 1=9$
$9 \times 2=18$
$1+8=9$
$9 \times 3=27$
$2+7=9$
$9 \times 4=36$
$3+6=9$
$9 \times 5=45$
$4+5=9$
$9 \times \ldots=$ $\qquad$ $\ldots+\ldots=$ $\qquad$
$9 \times \ldots=$
$\sim_{-}+\ldots=$ $\qquad$
$9 \times 8=$
$Z_{-}+\ldots=$ $\qquad$
Did you see the pattern in the 9 times table? What numbers are adding up to 9 ?

Observing patterns in multiplication tables deepens the understanding of the number system.
$\geqslant$
$\stackrel{3}{3}$
B. Complete the grid by multiplying the numbers

|  | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| 1 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| 2 | 2 | 4 | 6 | 8 | 10 | 12 | 14 | 16 | 18 | 20 |
| 3 | 3 | 6 | 9 | 12 | 15 | 18 | 21 | 24 | 27 | 30 |
| 4 |  |  |  |  |  |  |  |  |  |  |
| 5 |  |  |  |  |  |  |  |  |  |  |
| 6 |  |  |  |  |  |  |  |  |  |  |
| 7 |  |  |  |  |  |  |  |  |  |  |
| 8 |  |  |  |  |  |  |  |  |  |  |
| 9 |  |  |  |  |  |  |  |  |  |  |
| 10 |  |  |  |  |  |  |  |  |  |  |

Look at the cross in your grid.

Add the numbers together from top to bottom.
$3+6+9=18$
Add the numbers together from left to right.
$4+6+8=18$
The total is the same.
Look for other such crosses and copy them in your notebook.

## 

C．粦 Mark the numbers $1-10$ in the same grid in one colour．
米 Mark the numbers 12－20 in another colour．
米 Similarly mark 21－30 in a third colour．
Do you see any colour pattern？

141

Look around you and list three things in which you find some pattern. $\qquad$
$\qquad$
$\qquad$
Draw some patterns which you have found around yourself.

Hello! I am Pallavi. I live in Jaipur. My city is known for clothes with block prints. Have a look at some of the block print designs made by my mother.

She makes these designs by using blocks again and again. One day I got hold of the blocks and made a beautiful design.

You will see that these designs have been made by using the same block in different ways.
Can you see a pattern in the way each block is repeated?

Pictures in a Pattern

In this pattern there is one arrow up and one down. Then this is repeated.

## Practice Time

- Given below are some patterns.

Figure out the rule for each and continue the pattern.
a)

b)

A

BAA
B
c)
 $0 \quad 0$ O
d)

e)

f) Morning, afternoon, evening, night, morning, $\qquad$

## Growing Patterns

Can you see the rule and continue the pattern?

Try these also.
$\square$

## My Own Patterns

- Here is your space to make your own patterns:
i)
ii)
iii)
iv)
- Ask your friends to continue the patterns made by you.

## Number Patterns

We have made some patterns with pictures. We can make patterns with numbers too. Like $21,41,61,81,101, \ldots \ldots \ldots$.

You know the next number, don't you?
This is a growing pattern. It can go on and on.
21, 41, 61, 81, 101, 121, 141, 161, $\qquad$
A. Look for the rules and continue these growing patterns:
a) $51,56,61,66$, $\qquad$
$\qquad$ ..........
b) 7 , $\qquad$ 21, 28, 35, $\qquad$ , $\qquad$ ..........
c) $2,4,8,16,32$, $\qquad$
$\qquad$ $1+$
d) $12 \mathrm{~A}, 13 \mathrm{~B}, 14 \mathrm{C}$, $\qquad$
$\qquad$ .
B. Look at these growing patterns. Find out what to add to each number to get the next one:
a) $1,3,6,10$, $\qquad$ _ , $\xrightarrow{\square}$, $\qquad$ ,
b) $0,2,6,12$, $\qquad$ , $\qquad$ ,
c) $1,3,7,13$, $\qquad$ $\square,-\longrightarrow$
d) $2,3,6,11,18$, $\qquad$ _ $\qquad$

This chapter helps children observe and understand patterns around them. They can be given more examples of repeating or growing patterns to recognise the motif or basic unit which generates the patterns. Making secret messages or codes also helps pattern recognition. As their algebraic thinking develops, they will realise that the pattern created by the rule boy boy girl is the same as $\mathbf{A A B}$ or $\uparrow \uparrow \downarrow$. Some interesting and important number patterns that relate to mathematical operations are given.

## Secret Messages

Lalrini and Zomuana are writing secret messages.

Can you tell what they are trying to say?
These are two secret messages. Look for the patterns and find the hidden sentences.

$$
\text { 1I } 2 \text { L } 3 \text { O } 4 \text { V } 5 \text { E } 6 \mathrm{Y} 7 \mathrm{O} 8 \mathrm{U}
$$

ATBHCIDS EBFOGOHK IIJS KFLUMN

Now you also make your own secret messages.
$\qquad$
$\qquad$
$\qquad$

## Even and Odd Number Patterns

| 91 | 92 | 93 | 94 | 95 | 96 | 97 | 98 | 99 | 100 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 81 | 82 | 83 | 84 | 85 | 86 | 87 | 88 | 89 | 90 |
| 71 | 72 | 73 | 74 | 75 | 76 | 77 | 78 | 79 | 80 |
| 61 | 62 | 63 | 64 | 65 | 66 | 67 | 68 | 69 | 70 |
| 51 | 52 | 53 | 54 | 55 | 56 | 57 | 58 | 59 | 60 |
| 41 | 42 | 43 | 44 | 45 | 46 | 47 | 48 | 49 | 50 |
| 31 | 32 | 33 | 34 | 35 | 36 | 37 | 38 | 39 | 40 |
| 21 | 22 | 23 | 24 | 25 | 26 | 27 | 28 | 29 | 30 |
| 11 | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 | 20 |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |

Half these numbers are in yellow. What patterns do you see in these numbers? Continue the same pattern and fill in the blanks:

96, 98, $\qquad$ 102, $\qquad$
$\qquad$
$\qquad$
$\qquad$ -

How far can you continue this pattern?
These numbers have a special name. They are called even numbers.

Do any of these even numbers end with 3 or 5 ?
What do even numbers end with?
Look at the pattern of numbers in blue. Continue the pattern and fill in the blanks:

99, 101, $\qquad$ 105, 107, $\qquad$ , $\qquad$ -

What do the numbers in blue end with?

All numbers that end with 1, 3, 5, 7 or 9 are called odd numbers. Write all odd numbers between 400 and 410 .

Write all even numbers between 155 and 165.

If we add 1 to any odd number we get an (even/odd) number.

If we add 1 to any even number we get an $\qquad$ (even/odd) number.

What do you get if you add an even number to an odd number?

## Names in an Order

Adil has to arrange this list so that the names starting with A come first and then come those with B, C, D and so on. Number these names in the order in which they will come.

| Sharada | Mahadevan | Taitesena | Adil |
| :---: | :---: | :---: | :---: |
| Gurinder | Baichung | Harsha | Raja |
| Narayan | Kavita | Warsha | Elvis |
| Jalaj |  |  |  |

Jalaj is proud to have a special name. He says if you read it backwards it is still the same.

Which of the following names have the same pattern? Mark $\checkmark$. Harsh, Anna, Kanak, Munna, Ongbi There is a wedding in Bunny's family, a family of rabbits. Many guests are invited - deer, monkeys, elephants, cats, dogs, $2 f$ mice, foxes, camels, mongoose etc. special drink is served to all the guests - one glass each. Everyone finds the drink very tasty but some small guests like $\qquad$ cannot finish a full glass. But is able to finish his glass.

Some others like $\qquad$ , $\qquad$
$\qquad$ ask for more than one glass.
Now the trouble begins !!!
There are some big guests who go on gulping down glass after glass...!

Bunny wants to guess who drank how much.
Help him fill the table. Have fun!

Drank how much
Name of guest
Less than 1 glass
Between 1-5 glasses
Between 5-10 glasses
More than 10 glasses

## Water In, Water Out?

Have you ever thought like Laddu?

About how many glasses of water do you drink in a day?
Summer day :___ glasses

Winter day : $\qquad$ glasses
Can you guess how much water goes out of you?

Bottles and Buckets
Get a 1 litre bottle (can be an empty bottle of water, oil etc.). Now collect some
 bottles and a mug, jug, glass, bowl, etc. at your house. Use the l litre bottle to check which of these holds more than 1 litre and which one holds less than 1 litre. Make a small drawing if you like.

Less than 1 litre bowl

More than 1 litre
big cooking pot $\square$

- Now look at the buckets in your house.
- Guess how many litres of water they can hold.
- Use a 1 litre bottle and check if your guess is right for all the buckets.

| Bucket | My guess | My measure |
| :--- | :--- | :--- |
| Bucket 1 |  |  |
| Bucket 2 |  |  |
| Bucket 3 |  |  |

## Whose Jug Holds More?

What are Naima and Jeetu doing?
If Naima pours one glass of water in her jug, it looks like this:

Naima thinks she will have to pour around 3 glasses of water to fill the jug. What do you think? $\qquad$
If Jeetu pours one glass of water in his jug, it looks like this:

Whose jug holds more water?
How many glasses of water do you think Jeetu should pour to fill his jug?

If Jeetu pours one more glass of water his jug will be around
$\qquad$ full.

## Filling Pots

Naseem and Abdul had to fill their pots each with water. Both pots were equally big and heavy. So they went to the tap again and again, filled their own bottles and poured water into the pots.

Naseem had to fill her bottle 16 times from the tap. But Abdul had to fill his bottle only 8 times.

* Why did Naseem go more times than Abdul?
* Naseem's bottle can hold $\qquad$ (twice/half/three times) as much water as Abdul's bottle.

## How Many Glasses?

Pot B holds 11 glassfuls of water. Pot A holds twice as much water as pot B. How many glasses of water are needed to fill pot A? $\qquad$

> In class, children need to speak about their own daily experiences of measuring liquids and comparing the sizes of different containers. They must get many opportunities to use words like 'glassful', 'bucketful' etc. They will also get familiar with ideas such as 'half', 'twice', 'four times' the amount of water, and a sense of roughly how much one litre is.

## Filling Potholes

This is a small town near Kohima. There are some potholes in the road. Before the rains come, children want to fill the holes with pebbles. They bring pebbles in mugs of the same size.

Hole A gets filled with 9 mugs of pebbles.
Hole B gets filled with 18 mugs of pebbles.
Hole C gets filled with 12 mugs of pebbles.
(12) Con We Share?

How Many in Each Group?

0325 CH 12

There are 10 butterflies.
They are in 2 groups.
There are 5 butterflies in each group.

There are $\qquad$ caterpillars.

They are in $\qquad$ groups.

There are $\qquad$ caterpillars in each group.

- There are $\qquad$ laddoos.

They are in $\qquad$ groups.

There are $\qquad$ laddoos in each group.

- Draw 18 stars.

Put them into 2 equal groups.

There are $\qquad$ stars in each group.

- Draw 18 beads.

Put them into 3 equal groups.

There are $\qquad$ beads in each group.

## Share the Grains

Mummy bird brings 12 grains.

How to distribute equally?
Mummy bird starts by giving 1 grain to each baby.

Then Mummy bird gives one more grain to each baby.

Each baby has got 2 grains now. How many grains are left?
$\qquad$
She puts one more grain in each baby's mouth. All the grains are finished.

12 grains have been divided among 4 baby birds.
Each baby has got 3 grains.

$$
12 \div 4=3
$$

## Try These Now.......

Gopu has 3 plates of jalebis.
Each plate has a different number of jalebis.

Plate A

Plate B

Plate C

Now draw the jalebis on the plates below, so that each plate has the same number of jalebis.

Plate A

Plate B

Plate C

How many jalebis are there altogether? $\qquad$
How many jalebis are there in each plate? $\qquad$
Discuss in the class how you found the answer.

## Sharing them Equally

$\checkmark$ Here are six bananas.

If they share the bananas equally, each monkey will get two bananas.

6 bananas divided into 3 equal parts $=2$ bananas each $6 \div 3=2$

If there are six bananas

# $\pi \cdots \mathbb{N}$ 

and two monkeys,

each monkey will get three bananas.
Six bananas $\div 2=3$ bananas each
$6 \div 2=3$

Give children the experience of sharing things equally and writing corresponding division
statements.

If there are 60 bananas and two monkeys, how many will each monkey get?
$\qquad$ bananas.

Five friends found 10 five-rupee coins on the ground.
They shared them equally.

Each friend got ten rupees.
$50 \div 5=10$

If there are 16 ten-rupee notes and four friends to share, then
$16 \div 4=$ _and $4 \times 10=40$
so each friend gets $\qquad$ rupees.

Five friends found Rs 100. If they share it equally, how much will each get? $\qquad$

Hari Prashad has 30 metres of rope.
He distributes it equally among his three children.

Each child gets $\qquad$ metres of rope. If there is 36 metres of rope, how much
of rope will each child get? If there is 36 metres of rope, how much
of rope will each child get?
$\qquad$

And if there is 60 metres of rope, how much will each child get?

## How Many Shelves?

I have 20 books. I can keep 5 books in one shelf, so how many shelves do I need in my almirah?

Five books in the first shelf. 15 books are left.

5 more books in the second shelf. 10 books are left.

5 more books in the third shelf.
5 books are left.

5 more books in the fourth shelf.
20 books have filled up 4 shelves of the almirah.

20 books put into equal groups of 5 each take 4 shelves.

On this and the following page, division is done by making equal groups. For instance, here equal groups of 5 books each have been made. This process is different from sharing them equally (by distributing them into 4 shelves).

Now let us try this.
Here are 28 buttons.
©

A tailor puts 4 buttons on one shirt.

If there are 28 buttons, and the tailor puts 7 buttons on each shirt, there will be $\qquad$ shirts with buttons. $28 \div 7=$ $\qquad$

## Practice Time

1. Minku puts her 15 laddoos equally into 5 boxes.

(i) How many laddoos will there be in each box?

There will be $\qquad$ laddoos in each box.
$15 \div 5=$ $\qquad$
(ii) If she uses only 3 boxes, how many laddoos will there be in each box?

There will be $\qquad$ laddoos in each box.
$\qquad$ $\div 3=$ $\qquad$
2. Share 25 bananas among 5 monkeys. How many bananas for each monkey?

Each monkey has $\qquad$ bananas.
3. Share 12 balloons among 3 boys. How many balloons for each boy?

$\qquad$ $\div$ $\qquad$ $=$ $\qquad$
Each boy has $\qquad$ balloons.
4. There are 21 candles. Put them equally in 3 boxes. How many candles are there in each box?

##   <br> 

$\qquad$
$\qquad$
$\qquad$
5. There are 18 socks.

How many girls can wear these socks?

6. Raj has 36 minutes to make rotis. One roti takes 3 minutes. How many rotis can he make in this time? He can make $\qquad$ rotis.
7. These are 24 footmarks of goats.

So how many goats were there?

(1)
(1)
(1)
(1)
(1)
(1) a
(1)
(1)
(1)
(1)
8. Some girls are playing a game with both their hands.

The girls who are playing have 60 fingers altogether.
How many girls are playing this game?

9. Hmangaihi has 27 kg potatoes to sell.

Three men came and bought equal amounts of potatoes.
Each man bought $\qquad$ kg of potatoes.

## Jumpy Animals

Use the path on the next page to find out:

1. In how many jumps will the frog reach 30 ?
$30 \div 2=$ $\qquad$
2. In how many jumps will the squirrel reach 27 ?
$27 \div 3=$ $\qquad$

3. Which number will the kangaroo reach in two jumps?
4. Who all will meet at the number 15 ?
$\qquad$ , $\qquad$ , $\qquad$
5. Will the rabbit ever be at the number 18 ? $\qquad$
6. How many jumps of the rabbit equal one jump of the horse? $\qquad$
7. How many jumps of the horse equals two jumps of the kangaroo?
8. Which is the smallest number where the frog and the squirrel will meet?

## How Quick Are You?

Divide into groups of 2 using 2 times table.
\(\left.\begin{array}{rl}18 \div 2 \& =9 \begin{array}{l}Hint: <br>

2 \times 9\end{array}=18\end{array}\right]\)| $18 \div 9$ | $=2$ |
| ---: | :--- |
| $16 \div 2$ | $=$ |
| $20 \div 2$ | $=$ |
| $\div 2$ | $=7$ |
| $\div 2$ | $=10$ |
| $\div \div$ | $=4$ |

Divide into groups of 5 using 5 times table.

| $10 \div 5=\quad$Hint: <br> $5 \times 2=?$ |
| :--- |
| $20 \div=4$ |
| $15 \div 5=$ |
| $40 \div=8$ |
| $20 \div 5=$ |
| $\div 5=6$ |
| $25 \div 5=$ |
| $\div 5=3$ |
| $35 \div 5=$ |
| $\div 5=2$ |

Divide into groups of 10 using 10 times table.

| $20 \div 10=$ |
| :--- |
| $30 \div 10=$ |
| $40 \div 10=$ |
| $50 \div 10=$ |
| $40 \div=4$ |
| $\div 10=8$ |
| $\div 10=5$ |
| $\div 10=3$ |
| $\div 10=2$ |
| $60 \div=6$ |

- Try these.

| $4 \div$ | $=2$ |
| ---: | :--- |
| $14 \div 7$ | $=$ |
| $6 \div 3=$ |  |
| $\div 2=7$ |  |
| $15 \div 3=$ |  |
| $8 \div 4=$ |  |
| $15 \div 5=$ |  |
| $8 \div 2=8$ |  |
| $\div$ |  |
| 6 |  |

| $9 \div 3=$ |
| ---: |
| $18 \div 9=$ |
| $20 \div 5=5$ |
| $12 \div 4=$ |
| $20 \div 4=$ |
| $12 \div 2=2$ |

## $p Z^{Z Z_{I E}}$

Divide the clock face into three parts so that the sum of the numbers in each part is the same.

Flowers of Different Colours
Have you been to a park?
What coloured flowers did you see? Were most of the flowers yellow in colour?

Look at the different flowers in the picture. Complete the table:

Draw the right flower. Write how many there are.
a) $\qquad$ are the most in number. How many? $\qquad$ .
b) $\qquad$ are the least in number. How many? $\qquad$ .
c) $\qquad$ are more than $\qquad$

d) $\qquad$ are more than $\qquad$

## What do We See on the Road?

Look at the traffic scene in the picture and fill in the table.

This chapter is an early introduction to data handling, an important area of mathematics. By the end of primary school, children need to be able to collect and record data, to present it in the form of bar charts and tables, to recognise patterns in the data and to draw inferences.Teachers can take several interesting and even funny examples from chilldren's own experiences. Pictures given here could also be used for different classification exercises, such as the number of petals of flowers. $\cdots$

Answer the following questions.
a) In the picture which way of travel do you see the most? $\qquad$
b) Which way of travel (vehicle) do you see the least? $\qquad$
c) The number of people walking is more than the number of
d) The number of buses is less than the number of $\qquad$ How Many Times do You Get 6?

Have you played any games with dice?

How many dots are there on the different faces of a die?

* Throw a die.
* Look at the number of dots you get on the face of your die. * For each throw draw a mark / in front of that number in the table.
* Throw the die 30 times and mark in the table each time.

For example, Remsiami threw her die 30 times. She got five times. In her table she marked:

Now fill in the table:

a) Which face of the die did you get the most number of times?
b) How many times did come up? ___ times
c) $8:$ came up more number of times than $\square$
d) Compare your table with that of the student sitting next to you. Do you find any difference in the two tables?

## Find out from People Around You

1. Talk to people around you about their favourite sweets.

Fill in the table:

| Favourite <br> sweet | Number <br> of <br> people |
| :---: | :---: |
| Jalebi |  |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |

From the above table answer the following:
a) Most favourite sweet $\qquad$
b) Least favourite sweet
c) $\qquad$ is liked more than $\qquad$
(Name of the sweet)
d) $\qquad$ is liked more than $\qquad$
e) $\qquad$ is liked more than $\qquad$
f) $\qquad$ is liked more than $\qquad$

3. What have your classmates brought for lunch today? Find out and note down.

| Food item | Number of <br> students |
| :---: | :---: |
|  |  |
|  |  |
|  |  |

a) Food item brought for lunch by the biggest number of students $\qquad$
b) Food item brought by the smallest number of students
$\qquad$

## Getting Smart with Charts

| Attendance Board |  |  |  |
| :---: | :---: | :---: | :---: |
| Date 8/2/2014 |  |  |  |
| Class | Number of students | Students present | Students absent |
| Class I | 27 | 25 | 2 |
| Class II | 23 | 22 | 1 |
| Class III | 24 | 21 | 3 |
| Class IV | 22 | 18 | 4 |
| Class V | 25 | 23 | 2 |
| Total |  |  |  |

This board shows the number of students in each class. It also shows the number of students present and absent.

* How many children in all are there in the school? $\qquad$
* How many children in all are absent on that day? $\qquad$
Absent Students' Chart

| Class | Absent students |
| :--- | :--- |
| Class I | Class II |
| Class III |  |
| Class IV |  |
| Class V |  |

This is a chart to show the number of absent students. Each absent student is shown by .

* In the chart show the absent students of Class V.

Now look at the chart and fill in the blanks:
a) The class with the highest number of absent students is
b) The class with the least number of absent students is
c) The class with 3 students absent is $\qquad$ .
d) The number of students absent in Class IV and Class V are
$\qquad$ and $\qquad$

## How Long is Your Hand?

* Make a group of 4 friends.
* Cut strips from waste paper. The strips should be of the same width.
* Measure the length of each student's hand with the paper strip. Cut the strip and write the name of the student.

Rohan, Jacob and Geeta also measured their hands. They stuck their strips as shown.

Look at the picture and fill in the blanks:
a) The length of Jacob's hand is $\qquad$ (more/less) than Geeta's hand.
b) The length of Geeta's hand is $\qquad$ (more/less) than Rohan's hand.
c) $\qquad$ has the longest hand.
d) $\qquad$ has the shortest hand.

In the chart below stick the strips of all the friends in your group. Keep some space between the strips.

## Children coming to School

Look at the picture and fill in the table.

| Way of <br> coming | Tractor |
| :---: | :---: |
| Number of <br> students | 3 |

3 students are coming by a tractor. We write 3 in the table. We also draw 3 faces on top of 'tractor' in the chart. Draw faces in the chart to show how many children come by bus, bicycle, etc.

a) The most students come to school by $\qquad$ .
b) The number of students walking to school is $\qquad$ (more/less) than the students coming on bicycle.
c) The least students come to school by $\qquad$ .

So, isn't this a smart chart! By simply looking at it we can know
so much. Let us make more such charts.

## Practice Time

Make your own smart charts about things around you.
Like -

* Which bird has the most colours?

* Which is the animal which is liked most as a pet?

## A Vegetable You do not Like!

Which vegetable is most disliked? Ask your friends and complete the table.

| Vegetable disliked | Number of students |
| :---: | :---: |
| - |  |
| - |  |

Use this table to draw faces in the chart below. Draw for each child on top of the vegetable disliked.

* The most disliked vegetable is $\qquad$ _.
* The vegetable disliked by very few children is $\qquad$ .

##  <br> 0325 CH 14 <br> Rupees and Pause

* Take a sheet of paper and make a fold at the centre.
* Fold the two corners 'A' and 'B' to meet at the dotted line.
* Now the sheet will look like this $\qquad$

* Fold the top part of the sheet backwards so that the back of the sheet looks like this and the front looks like this $\qquad$

$\qquad$
C
D

* Place the front side of the sheet up and fold the edges CD and EF to meet at the dotted line.

Now it will look like this:

* Fold down the top along the dotted line so that the figure now looks like this:

* Fold the back flap down and the money purse is ready!

## Money for Our Purse

\% Collect different coins.
$\%$ Keep a coin on a flat table. Place a thin paper on it.
$\because$ With one hand hold the paper tight. Rub the tip of the pencil over the paper softly to trace the coin.
\% Slowly the face of the coin will appear.
$\%$ Cut out the traced coins and keep them in your purse.

Now make notes by cutting paper and writing the value of the note on each.

## Money Game

ڤ Use notes and coins to show the following amounts of money (you can also keep some money in the purse you had made).

- Twenty-six rupees

- 4 rupees 75 paise
- 78 rupees
- 130 rupees
- 8 rupees 75 paise
- 53 rupees

Write the amounts of money shown by the notes and coins.

One hundred one rupees

## Shopping

## B. Find out the total cost of:

* One toy giraffe, one copy and a glass of lemon juice ₹ $\qquad$
* One glass of milk, one packet of biscuits and a banana ₹ $\qquad$
* One notebook, two pencils and two erasers $\qquad$
* Two tops, three toffees and two bananas $\qquad$
C. What can you buy if you have a twenty-rupee note?
* 1 toy car, 1 lemon juice, 1 banana
* $\qquad$ , $\qquad$ , $\qquad$
* $\qquad$ , $\qquad$ ,
* $\qquad$ , $\qquad$ ,
* $\qquad$ , $\qquad$ ,

D. You need to make a cash memo for the things you bought. Before adding, first guess how much money will be needed. Then find the total and check your guess.

Muana prepared the following cash memos:
Check the cash memos and correct them if you find a mistake.

| Cash Memo <br> Self Service Store |  |  |  |
| :---: | :---: | :---: | :---: |
| Item | $\begin{array}{\|c\|} \hline \text { Rate } \\ \text { per Item } \\ \hline \end{array}$ | $₹$ | Paise |
| 1 Ball | 7 | 7 | 00 |
| 3 Pencils | 2.50 | 7 | 50 |
| 5 Toffees |  | 2 | 50 |
|  | Total |  | 00 |

| Cash Memo <br> Self Service Store |  |  |  |
| :---: | :---: | :---: | :---: |
| Item | $\begin{array}{\|c\|} \hline \text { Rate } \\ \text { per Item } \\ \hline \end{array}$ |  | Paise |
| 1 Toy car |  |  |  |
| 3 Glass milk | 3.50 | 10 |  |
| 4 Notebooks | 5 | 20 | 50 |
|  | Total | 45 | 00 |

| Cash Memo <br> Self Service Store |  |  |  |
| :---: | :---: | :---: | :---: |
| Item | $\begin{array}{\|c\|} \hline \text { Rate } \\ \text { per Item } \end{array}$ | ₹ | 1 Paise |
| 1 Toy | 6.50 | 6 | 50 |
| car | 2.50 | 7 | 50 |
| 3 Pencils |  |  |  |
|  | . 50 | 3 | \| 50 |
| 7 Toffees |  | 4 | 50 |
| 1 Biscuit | 4.50 |  |  |
| 1 Biscuit | Total | 21 | 150 |

* Add the following:
a)
$₹ 12.50$
$+₹ 13.00$
b)
$₹ 55.50$
$+₹ 14.00$
c) ₹ 30.00
+ ₹ 31.50
$\qquad$
$\qquad$
$\qquad$
* Subtract the following:
a)
$₹$
$-₹ 11.50$
- 

b) ₹ 103.50

- ₹ 62.00
c) ₹ 19.50
-₹ 7.00

## E. You have 30 rupees with you. Find out how much money will be left after buying the following items:

* One ball, one doll and one toy giraffe Total cost $\qquad$ Money left $\qquad$ .
* Two bananas, one pack of biscuits and two glasses of lemon juice.
 Total cost $\qquad$ Money left $\qquad$ .

* Three notebooks, two pencils and two erasers. Total cost $\qquad$ Money left $\qquad$ .

## Practice Time

A. Three friends wanted to buy a cricket bat and ball.

Biaki had ₹ 48.50, Rama had $₹ 55.50$ and Vena had ₹ 38.00 . How much money did they have in all?

B. Hari booked a railway ticket for $₹ 62.50$. He gave a 100 -rupee note. How much money will he get back with the ticket?
C. Ngengi and her friends went shopping. She bought things for ₹ 58 , ₹ 37 and ₹ 22 . Gita had a hundred-rupee note. How much money should she borrow from her friends to pay the bill?

D.

## Mumbai News <br> Children Freed from Factory

10 young children working in a bangle factory were set free
 today. A news reporter and the police found them in a sad condition. The factory made the children work very hard. It paid them only ` 80 a day.
The children are happy to go back to their homes in their village. They will go to a special school so that they can learn to study like other children their age. By making children work, the factory tries to save money. The police will now take action.

Let us see how much money the factory tries to save.
Money 1 older worker should get $=₹ 513$ a day
Money 1 child is paid
$=₹ 80$ a day
On 1 person the factory saves ₹ $513-$ $\qquad$ $=₹ 433$ a day

On 10 persons the factory saves

$$
₹ 433 \times 10=₹ \ldots \ldots \text { a day }
$$

## Find Out

In your area are there shops or factories where young children are made to work?
Talk to some of these children.
How much are they paid there?

Understanding of 'money' need not only be about buying or selling. Teachers can talk about children's experiences of related issues, such as, wage and work etc.

## Train Journey

This train goes from New Jalpaiguri to Guwahati. On its way, it stops at New Mal, Alipurduar and Goalpara stations.

The cost of a rail ticket to different stations is given in the table.

## Find the distance:

a) From New Mal to Guwahati $\qquad$
b) Between New Mal and Goalpara $\qquad$
c) From Alipurduar to Guwahati $\qquad$
d) Between New Mal and Alipurduar
e) From Goalpara to Guwahati $\qquad$

## Find the cost of tickets:

a) Bhupen is going from New Jalpaiguri to Alipurduar. What is the cost of his ticket?
b) Indira has to go from New Jalpaiguri to Goalpara. How much does she pay for the ticket?
c) Debu, Shoma and Gobind are going from New Jalpaiguri to New Mal. What amount will they pay for three tickets?

They give a ₹ 50 note for the tickets. How much money will they get back?

## A Page to Cut Out

Cut these tiles and paste on a card. Make as many copies as you want and cover the floor.

You can cut these out
 and use as play money.

## ©SCERT MI not to be

## ©SCERT MI not to be

[^0]:    'Panga' is a colloquial word which gives the sense of a problem or a quarrel. It has been used deliberately because children can find it amusing.
